WITH the approval of the Secretary of State for India the Governor-General in Council is pleased to direct that the rules for the supply of articles for the public service appended to this Resolution shall be substituted for the rules promulgated with the Resolution in this Department No. 4941-4988-102, dated the 14th July 1909, as amended from time to time.

ORDER.—Ordered that this Resolution be communicated to all Departments of the Government of India, to all Local Governments and Administrations, to all Accountants-General and Comptrollers (including the Comptroller and Auditor-General), to all Heads of Departments subordinate to this Department, and to the Private and Military Secretaries to His Excellency the Viceroy.

RULES FOR THE SUPPLY OF ARTICLES FOR THE PUBLIC SERVICE.

Subject to the provisions of the General Rules specified below, and to any instructions regarding specific articles which have been, or may be, issued by the Government of India from time to time (*e.g.*, those relating to the supply of stationery), the following are the rules relating to the supply of articles required for the public service :—

RULE 1.—*Articles manufactured in India from Indian materials.*

All articles which are produced in India in the form of raw material, or are manufactured in India from materials produced in India, should, by preference, be purchased locally, provided that the quality is sufficiently good for the purpose, and the price not unfavourable.

RULE 2.—*Articles manufactured in India from imported materials.*

All articles manufactured in India from imported materials should, by preference, be purchased in India, subject, however, to the following conditions :—

(*a*) That a substantial part of the process of manufacture of the articles purchased has been performed in India.

(*b*) That the price is as low as that at which articles of similar quality can be obtained through the India Office.

(*c*) That the materials employed are subjected to such inspection and tests as may be prescribed by the Government of India.

RULE 3.—*Articles which are not manufactured in India.*

Articles which are not manufactured in India should be obtained by indent upon the Store Department of the India Office, except in the following cases :—

(*a*) When the articles are already in India at the time of order, and their price and quality are not unfavourable as compared with those at which similar articles could be obtained through the India Office, and the cost of the supply does not exceed the limits prescribed at the end of Rule 13.

(*b*) In the case of important construction works let out on contract, articles not manufactured in India required for the construction of such works may be supplied by the contracting firm, subject to the following conditions :—

(i) That the firm is approved by the Government of India and is included in the list of firms so approved.

(ii) That the materials are subject to the current specifications and tests prescribed by the Government of India.

RULE 4.—*Articles which may be purchased in India.*

The following articles, whether manufactured or produced in India or not, may be purchased in India, provided that the quality required is obtainable :—

(*a*) Those of a perishable nature.

(*b*) Explosives.

(*c*) Block tin.

(*d*) Wines and spirits and English bottled beer for the use of Government hospitals in India.

(*e*) Kerosine oil.

(*f*) Plant and materials for electric installations intended to take current from existing centres. The local purchase of electric power plant and lighting plant which involve the provision of generators and cables for distribution is not, however, permissible under this clause.

(*g*) Australian timber.

(*h*) Australian copper.

(*i*) Italian marble.

(*j*) Such other classes of articles as may from time to time be prescribed by the Government of India. All such cases should be reported to the Secretary of State for his information.

RULE 5.—*Special purchases in India.*

When serious inconvenience to the public service would be caused by waiting to obtain an article from England through the Director-General of Stores, or when, owing to the greater promptitude of supply, an economy can be effected by purchasing in India articles which, under the foregoing rules, should be obtained through the Store Department, the purchase may be made in India, subject to Rule 13, provided that the articles are already in India at the time of order; but in such cases, if the value of the articles exceeds Rs. 750, the sanctioning officer should place on record the reasons which make the local purchase desirable. This record shall be available for the inspection of the Examiner of Accounts or the Supervising Officer when required.

RULE 6.—*Inter-departmental purchases.*

Nothing in the rules is to be deemed to prohibit the purchase of stores of European manufacture by one Department or Railway from another.

RULE 7.—*Method of obtaining Stores not purchased in India.*

All articles which under the foregoing rules are not to be bought in India should be obtained by indent on the Store Department of the India Office, except any which the Secretary of State may have specially authorised the Government of India or its officers to purchase direct outside India. Such purchase is at present permissible in the case of the following articles:—

(ii) Cinchona bark.

GENERAL RULES.

RULE 8.—*Forecast of Requirements.*

Every effort should be made to foresee requirements so that there may be ample time to send forward indents for such articles as should under the rules be obtained from the India Office. Persistent failure of any officer to make such efforts should be brought to notice by the Local Government or other authority, which may, at its discretion, cancel or reduce the powers of sanction entrusted to the officer at fault.

RULE 9.—*Time required to obtain Stores from England.*

It may be assumed that the time required from the transmission of an indent upon the Secretary of State to the receipt of the stores is:—

Urgent telegraphic indents, not less than three months.
Ordinary indents, six to ten months, according to the article demanded.
For special stores, *e.g.*, large girders, rolling stock, &c., up to one year in ordinary times.

RULE 10.—*Method of comparing Prices.*

In all cases in which the selection of source of supply depends upon comparison of prices, the procedure to be adopted for such a comparison is as follows :—

(i) A reference should be made to Home prices as shown in the Rate Lists, and freight should be added at the lowest rates paid by the India Office together with 13*s.* 4*d.* per 100*l.* for interest, 2*s.* 2*d* per 100*l.* for insurance, and 3*d.* per ton for freight brokerage.

(ii) In cases of important contracts, the prices ruling in the English market should be ascertained by telegraphic reference to the Director-General of Stores.

(iii) In cases where the necessary information as to Home prices is not available from the Rate Lists, the purchase in India shall be subject to the condition that the price is not unfavourable.

(iv) In order to arrive at the market value at an Indian port of the article imported from England the following charges shall be included :—

(*a*) Landing, wharfage, and port charges as shown in the Rate Lists.

(*b*) Customs duty, as shown in the Tariff to be applicable to the article in question, to be calculated on its cost *plus* the additional charges mentioned in the earlier part of this rule.

RULE 12.—*Firms from which iron and steel may be bought in India.*

V of 1902 ...	The Administrators General and Official Trustees Act, 1902.	So far as it relates to Administrators General and Deputy Administrators General.

STATEMENT OF OBJECTS AND REASONS.

THE bulk of the existing law relating to the office and duties of the Administrator General is to be found in Act II of 1874. When this Act became law, it was desired to provide for a class of Administrators General who were to be remunerated by commission, to furnish security to Government, to be liable for claims brought against them and to be located in the Presidency-towns. The Act has been amended on several occasions, and finally in Act V of 1902 legislation was undertaken by which the Administrator General may be a salaried officer of Government, for whose liabilities Government is responsible, and the fees for whose services are credited to Government, while by the same Act some measure of provincial decentralisation was provided for.

2. The draft Bill carries this process a stage farther, and does away with the class of Administrators General who were remunerated by commission, and makes all Administrators General Officers of Government remunerated by fixed salaries, whose liabilities are undertaken by Government, and whose fees are credited to Government.

3. The qualification necessary for appointment to the post of Administrator General under the present law is unnecessarily narrow. The Bill gives Government a wider field of selection for this appointment.

4. Further power is taken by the Bill to permit a more complete system of provincial decentralisation of the office of Administrator General. It has been considered necessary, on financial grounds, to provide for a modification of the normal qualifications for appointment to the post of Administrator General when this power is exercised.

5. The Bill also permits greater elasticity in fixing the fees to be levied under the Act. Experience has shown that many estates, which might otherwise have come into the Administrator General's hands to their benefit, have been debarred from doing so on the ground of expense. While, however, it has been provided that Government may prescribe the fees to be levied under the Act, this power is limited by the provision that only such fees may be prescribed as will produce an annual amount sufficient to discharge the salaries and other expenses incidental to the working of the Act including such sum as Government may determine to ensure their revenue against loss.

6. Following the modern practice certain other matters now expressly provided for in the law, but which are in the nature of subsidiary rules of procedure, have been left to be dealt with under the extended rule-making power provided by the Bill.

7. Certain minor amendments in the substance of the law due to judicial decisions or further experience in the working of the Act have become desirable, and opportunity has been taken to embody them in the Bill.

8. The law relating to the office and duties of the Administrator General is now contained in five different enactments, and as it is desirable that this branch of the law should be contained in a single enactment, consolidation has been undertaken *pari passu* with the amendments specified above. The table of distribution of Acts annexed to the Bill and the Notes on Clauses attached hereto explain the more important changes to which the Bill gives effect.

NOTES ON CLAUSES.

Clause 2.—The definition of "assets" in section 3 of Act II of 1874 has been amplified and brought into accordance with the generally accepted meaning of the word as explained by judicial decisions.

Clause 5.—This clause by which the Administrator General is made a corporation sole with perpetual succession and an official seal enables many of the provisions of the present law to be omitted or shortened. The change in the position of the office of Administrator General which has taken place since the Act of 1874 was drafted has rendered this possible, and the provision is in accordance with section 1 (*2*) of the Public Trustee Act, 1906.

Clauses 15 and 16.—These clauses which correspond in substance with sections 21 and 65 of the Act of 1874 have been recast. All matters which are provided for by the Regimental Debts Act, 1893 (55 & 56 Vict., C. 57), have been left to the operation of that Act to which the Administrator General is bound to refer in order that he may carry out the duties imposed on him thereby.

Clause 23.—Confers on the Administrator General in a general form the special privileges which are conferred on him by the latter part of section 16 of Act II of 1874 in a restricted way.

Clause 26.—This clause corresponds to section 28 of the Act of 1874 with the exception of sub-clause (5). This sub-clause has been added as it has been represented that both in the interests of the estate and of the creditor the Administrator General in dealing with creditors' claims might well be treated as if he were a Court so far as to stop limitation running against the creditor.

Clause 34.—Gives effect to the present practice in respect to the issue of certificates, and makes the position of the holder of such a certificate quite clear. This is not definitely provided for in the existing law, and it has been thought desirable that the matter should be elucidated.

Clause 35.—Gives power to the Administrator General to revoke a certificate granted by him on the analogy of the powers possessed by a Court to revoke a grant under section 234 of the Succession Act (X of 1865).

Clause 36.—Provides for the surrender of the certificates revoked and for a penalty on failure to do so. It is based on section 333 of the Succession Act (X of 1865).

Clause 41.—Is new. The existing law as explained in Bhola Ram Choudhuri *vs.* the Administrator General, 1904, 8, C. W. N., 913, requires notice under section 80 of the Code of Civil Procedure, 1908, to be given in all suits against the Administrator General. It is considered that such notice need not be required save in cases where relief is claimed against the Administrator General personally, and the clause provides for this.

Clause 42.—This clause allows greater flexibility in fixing the fees to be levied under the Act, while sub-clause (2) thereof makes it clear that Government is not to make such fees a source of revenue.

Clause 49.—Is new. It is considered desirable that persons beneficially interested in an estate under the administration of the Administrator General should have reasonable powers of inspection, etc., of the accounts thereof. The clause which is on the lines of section 13 (*3*) of the Public Trustee Act, 1906, provides for this.

Clause 52.—This reproduces section 62 of the Act of 1874, with the modification that the period after which assets are to be transferred is 12 instead of 15 years.

Clause 54.—Corresponds with section 64 of Act II of 1874, but contains a new provision permitting the District Judge to sell assets coming into his hands in virtue of this section where the sale is desirable on the ground that they are liable to decay or for other sufficient reason. It has been represented that the absence of this power has occasioned inconvenience and loss to estates.

Clause 58.—The corresponding provision, section 68 of Act II of 1874, only referred to the Presidency of Bengal. The clause is of general application, and gives general power to provincialize the administration of the Act.

THE SCHEDULE.

ENACTMENTS REPEALED.

(*See Section 32.*)

Year.	No.	Short title.	Extent of repeal.
1864 ...	XVII	The Official Trustees Act, 1864.	So much as has not already been repealed.
1890 ...	II	The Probate and Administration Act, 1890.	Sections 1 to 8.
1902	V	The Administrators General and Official Trustees Act, 1902.	So far as it refers to the office of Official Trustee, or Deputy Official Trustee.

STATEMENT OF OBJECTS AND REASONS.

1. The revision of the law relating to the office of Administrator General has necessitated the revision of the law relating to the office of Official Trustee. Many of the provisions of the existing law already apply *mutatis mutandis* to both offices, and it is considered desirable further to approximate the constitution of these offices and the conditions of their tenure as closely as possible since their duties will be normally discharged by the same person. The existing law relating to the office of Official Trustee is contained in the Official Trustees Act XVII of 1864, the Probate and Administration Act, II of 1890, and the Administrator General's and Official Trustee's Act, V of 1902. The trend of this legislation has, as in the case of the legislation relating to the Administrator General, been to substitute for a class of Official Trustees remunerated by commission a class of salaried officials whose liabilities are undertaken by the Government in return for fees credited to the Government. The draft Bill carries this process a stage further, and does away with the old system of Official Trustees remunerated by commission.

2. Under the existing law Official Trustees are subject to the control of the Government and of the High Court. For obvious reasons such a dual control is undesirable, and the bulk of the opinion consulted, including that of the Calcutta High Court, is in favour of the transfer of the whole control to the Government. The Bill gives effect to this object. Since the Indian law relating to the office of Official Trustee was enacted, the Public Trustee Act, 1906, 6 Edw. VII, Cap. 55, has been passed, and consideration of some of the provisions of that Statute have enabled useful amendments to be made in the Indian law. The Bill further deals with the qualifications for appointment as of Official Trustee, fees, the rule-making power and similar matters on the same lines as those explained in connection with the Bill relating to the office

of Administrator General. Opportunity has been taken to make several minor amendments in the law and to consolidate the enactments relating to the Official Trustee. The more important of the changes are explained in the table of distribution annexed to the Bill and in the Notes on Clauses annexed hereto.

NOTES ON CLAUSES.

Clause 2, 5 (a) (b) (c).—The opportunity has been taken to define the Presidencies for which purpose reference was previously necessary to the Administrator General's Act.

Clause 5 is new. It follows section 1 of the English Public Trustee Act, 1906. This clause does away with the cumbrous existing provisions securing the succession of individual Official Trustees, by declaring an Official Trustee to be a corporation sole.

Clause 6 brings together the powers and duties of the Official Trustee in a convenient manner It follows mainly the English Act, for example in prohibiting the Official Trustee from managing insolvent estates or accepting trusts which involve the carrying on of any business. These provisions are necessary as Government has undertaken the civil liabilities of the Official Trustee. By sub-clause 2 he is declared to have the same powers and liabilities as a private trustee, and is allowed an option to decline any trust.

Clause 8—It is considered desirable to make provision for the appointment by will of the Official Trustee as trustee of property bequeathed by the will.

Clause 10 partly follows section 10 of the Act of 1864. Under that section, however, if trustees and all the persons beneficially interested in a trust desired to appoint the Official Trustee they might do so by leave of the High Court This clause renders such permission unnecessary. It follows the principle of section 31 of the Administrator General's Act, 1874, and will result in saving trust estates unnecessary expense.

Clause 12.—Under section 6 of the Act of 1864 it is obligatory for the Official Trustee to give security. This clause in so far as it does not require security follows section 12 of the Administrator General's Act, 1874. As the Administrator General will, as a rule, also be Official Trustee, it does not seem necessary to take security from him in one capacity and not in the other.

Clause 13 provides that the entry of the Official Trustee in the books of a company is not to constitute notice of a trust. A company, therefore, will not be entitled under section 53 of the Indian Companies Act VI of 1882 to object to entering the name of the Official Trustee on its register, and the fact that the Official Trustee is a corporation will not affect his dealings with the outside world. This clause follows section 11 (5) of the English Public Trustee Act, 1906.

Clause 14 makes the revenues of Government liable for the acts of the Official Trustee, except in cases where the Official Trustee and his subordinates have not contributed to the liability or where loss could not have been averted by the exercise of reasonable diligence. These exceptions were not included in section 3, sub-section (3) of Act V of 1902, but are contained in section 7 of the English Act which it is deemed advisable to follow.

Clause 15 provides that notice of suit against the Official Trustee is not required in cases in which no relief is claimed against him personally.

Clause 17.—The fees of an Official Trustee are at present fixed either by the deed of settlement with the consent of the Official Trustee, or according to a fixed percentage on the trust capital and income, or by the High Court. The first two methods are unsatisfactory. In the first case, the settlor of the trust is ignorant of the remuneration considered suitable by an Official Trustee, and different Official Trustees may hold different views on the subject. In some cases the remuneration offered may be considered insufficient with the result that the trust is declined; in others it may be excessive. In the second class of cases the system is wanting in elasticity as it is impossible to provide for the different classes of property which may pass to the Official Trustee. It has been found by experience that it results in charges disproportionate to the cost of management. It is also unsuited to the altered circumstances as Government desires to make no profit out of trust estates and for this purpose must have power to alter rates of fees from time to time. This clause therefore provides for the fixing of fees by rule according to the cost of the administration of different properties or classes of properties and the total cost of the working of the Act. In the case of existing trusts it is provided that the present scale of fees will not be exceeded.

Clauses 19, 20 and 21 provide for audit of the accounts of the Official Trustee by Government auditors. Audit is at present controlled by the Chief Justice, but Government having undertaken liability for the acts of the Official Trustee responsibility for audit is a natural consequence. Otherwise these clauses follow and amplify the present law.

Clause 22 provides for inspection of accounts by beneficiaries of trusts and follows the English Act.

Clause 31 is on the lines of section 34 of the Act of 1864 as amended by Act II of 1890, but gives power in the case of any Presidency instead of the Presidency of Bengal only.

Instructions for arrest.

8. In every case in which an arrest is ordered under section 7, the officer ordering it shall give written instructions over his own signature to the officer making the arrest; and the officer making the arrest shall, at the time of making it, furnish a copy of the said order to the person arrested.

No provision of this Act shall prevent any authority empowered under any other Law or Regulation for the time being in force from dealing, under the sanction of the Local Government, in such manner as may by such other Law or Regulation be provided, with any person suspected of or charged with an offence described by this Act.

STATEMENT OF OBJECTS AND REASONS.

This Bill is directed exclusively against the importation of Foreign women for prostitution and against persons who import and trade on them. This traffic is detrimental to public morality. Imported prostitutes are undesirable aliens, and all persons who trade on them are injurious offenders who ought to be restrained by law. There is no reason for continuing immunity to any trade degrading to its own agents, reacting perniciously on public morality, and often involving cruelty to helpless women.

Female victims are of two classes, European and Asiatic. The Police of Calcutta and Bombay have either partially repressed the European trade or deported its middlemen, or done both. But proof occasionally offers of the presence of European victims and of traders on them and controverts any claim or hypothesis of complete suppression of even the so-called White Slave Trade, while, in the case of any traffic, hidden in its nature and subtle in its methods, exceptions to the hypothesis or claim of complete extirpation may be more numerous than is desired and imagined, or detected. Women in increasing numbers have of late years been imported from Japan and elsewhere, and, apart from evidence of the fact sometimes secured, the assumption is tenable that no such traffic could flourish or survive unless others than its victims profited by it, and, in the latter case, unless any balance of profit exceeded its miseries. There is no reason in law or morality why any distinction should be drawn between traders in European and traders in Asiatic foreign prostitutes. The political argument, that discredit is reflected on the governing race by white prostitution, in no way tells against the need of deterring or punishing any known offence against public morality partaking of the nature, and ensuring some of the results, of crime.

The special powers under which traders in European prostitutes have sometimes been dealt with by deportation, though effective, were created for political ends; and any extensive use of them, on the scale needed to make them effective against the already large and growing traffic in Asiatic foreign women, would offend the public sentiment against any summary procedure which set aside all the ordinary safeguards of the law affecting personal freedom, on any other than high political grounds.

If it be imagined that all foreign Asiatic prostitutes are voluntary victims, not only is there no proof of the assumption, against which all the experiences of the victims seem to testify, but the tortuous manner in which these females are often brought into India by circuitous route,—*e.g.*, being first landed in Pondicherry, and then distributed over the country—raises the fair presumption that secrecy is resorted to in order to veil illegalities, evade detection, and escape criminal proceedings. In a traffic carried on for mere profit, no expense will be incurred that can be avoided, unless to avoid some risk considered great enough to be worth the cost of avoiding it. In this traffic, criminality is confined to the systematic practice of deceit or restraint, or of both, on women, but needs searching treatment to be disentangled from lawful subterfuges: though, even if proof were forthcoming that neither

deceit nor cruelty was practised, and that the women were voluntary victims, the offences against public morality committed by the traders in undesirable aliens would lose nothing of its odious, degrading, depraving and injurious character, regarded as offences against the welfare of this country.

The evil against which this Bill is directed has increased of late years, and is growing steadily. As it has a constant injurious effect on the public welfare, for which no extenuation can be urged, and for the continued freedom of whose agents from legitimate restraint no plea can be advanced, the evil demands prompt and effective treatment. The confidence is not misplaced that the mere enactment of this Bill will have a great deterrent effect, and that it may need to be rarely enforced.

STATEMENT OF OBJECTS AND REASONS.

Definitions.—The definitions of "husband" and "wife" are inserted for the protection of the interests of persons who, for no fault of theirs but in consequence of case law, find their union illegal. The other definitions are thought expedient.

Chapters II-IV.—The present criminal law of India, however complete in other respects, has been found ineffective and unavailing against certain offences of which girls under sixteen years of age are the subject. In most grave offences against females provided against in the Indian Penal Code, the age limit is sixteen years, but in s. 375 it is as low as twelve years. Making every allowance for human weakness, that limit is too low. It cannot be that a girl of and above twelve years of age and under sixteen years of age has that intelligent apprehension of the consequences of her acts as would make her consent of any real value. And yet one mistake during this immature period may ruin her for life. Especially is this danger imminent in a casteridden country like India with stringent social laws. The operation of social and economic laws has also had the result of making late marriages even in the case of girls either necessary or popular. Unmarried girls of over twelve years of age are now common. The protection of these girls should be provided for. It is proposed accordingly to raise the age when a consent given by a girl to her own defilement by strangers is valid, to sixteen years. This change in the law will not entail any hardship. Common prostitutes are exempted from its operation. It will not affect the present Exception to s. 375 of the Indian Penal Code. The marital rights of husbands over girl-wives of and over twelve years of age are thus safeguarded. The agitation against the Age of Consent Bill of 1891 was grounded upon the fear that it would seriously affect conjugal happiness. So far as public feeling can be gauged, there is no objection to raise the age limit to sixteen years as against strangers. Instead of amending the Indian Penal Code for the purpose, it has been thought advisable to introduce the change by a separate Act, complete by itself as far as practicable, modelled upon the English Criminal Law Amendment Act of 1885, 48 & 49 Vict., Ch. 69.

Opportunity is taken to provide against other offences, more or less grave, which either outrage the moral sense of the community or are injurious to the best interests of society. In India, many evil practices are still suffered to exist under the cloak of religion. They are the relics of a past which has hardly anything in common with the present. The progressive enlightenment of the people under Western influence has discredited most of them. The Courts have put a liberal construction upon the law so as to bring many of them within its purview, without any violence to orthodox feeling. But the interpretation has necessarily been characterised by a diversity which is undesirable, and while with regard to some offences there is a consensus of judicial opinion, with regard to others the law is by no means well-established. Dedication of girls under sixteen years of age, for instance, to an idol, involving as it does life-long prostitution, is now penal. There is a long current of decisions on this point. The removal, however, of a girl of tender years from British India for such purpose has been held by the highest Court in Bombay to be no offence. (*Queen-Empress v. Baku and anr., I. L. R. 24, Bom., 257*). Procuration, again, is nowhere expressly provided against. It is doubtful if the present law is sufficient for its suppression, however desirable that result may be from moral considerations. It has, on the contrary, been held in a number of cases that the procuration of minor girls for single acts of sexual intercourse is no offence under the present law. The Bill therefore makes all these offences, which are either not provided against or regarding which there is any doubt, punishable. Experienced opinion also favours the idea of introducing in a Bill which has for its object the greater protection of girls of a tender age an express provision against the dedication of girls to idols, etc. Clause 3 is accordingly framed for the purpose principally of making penal by Statute this offence which is still unfortunately common through ignorance, it is apprehended, on the part of the people and the Police of the Case Law under ss. 372 and 373 of the Indian Penal Code. It incorporates the existing judicial decisions on the point and does not seek either to introduce any new law or to affect in any way the aforesaid sections of the Indian Penal Code. The *Explanation* ha been suggested by experience.

There is then a class of offences, unfortunately common, in which as great an injury is inflicted upon a girl under sixteen years of age by her transfer by the lawful guardian, but which are not punishable under s. 372 of the Indian Penal Code. Possession of infants by prostitutes for their preparation in the line, and sham marriages of little girls with the object of circumventing the law, are of frequent occurrence. The girl is ruined, but it is always difficult to prove the criminal intention of the party, contemplated in ss. 372 and 373 of the Indian Penal Code, until the girl has actually adopted prostitution as a profession and her future is blasted. Prosecutions are consequently rare, and the evil grows unchecked Adoption of a minor girl by a dancing-girl, again, has been held to confer no civil rights upon the adopted girl (*Mathura Naikin and ors. v. Esu Naikin and ors., I. L. R. 6 Bom, 545*), but, according to J. Mathuswamy Aiyar, it is not indictable under s. 373 of the Indian Penal Code if the transaction be for the *bonâ fide* purpose of making a suitable disposition of the adoptive mother's property (*Queen-Empress v. Ramanna and ors., I. L. R. 12 Madras, 273*). This provides a loophole for an offender, while the certain result of the adoption is the ultimate ruin of the adopted girl. This is not satisfactory, and it is desirable that the giving away in adoption to, and the adoption by, a dancing-girl of a girl under sixteen years of age should be stopped by statutory prohibition. The liability of owners, occupiers, managers, etc., allowing offences to be committed against girls of tender years at places in their control, is, following the English precedent, fixed in the Bill.

Customs have in the past been set up to justify transfer of girls under sixteen years of age in concubinage as also the sale of wives. The decided cases establish this much that such immoral transfers in the latter case, in the absence of clear proof of special custom, is unlawful. What would happen if such custom is proved, is by no means certain. The probabilities are the custom pleaded and proved would be a sufficient defence. Concubinage is condoned by the existing law. This is revolting to all ideas of morality, decency and social well-being. Provisions have accordingly been made in the Bill to make such acts indictable. Chapter IV deals with such offences. Some sections of the Indian Penal Code for the protection of the innocent victims of compulsion, fraud, etc., have been incorporated in the Bill.

Chapter V.—Abetment and attempt at commission of offences under the Bill have been made punishable as in the Indian Penal Code.

Clause 17.—Youthful offenders should be dealt with more leniently. S. 562 of the Criminal Procedure Code has with that view been made specially applicable to that class of offenders under the Bill, with this difference that in the Bill the course has been made obligatory upon the Courts.

Chapter VII.—The offences contemplated in Chapters II to V of the Bill, subversive as they are of order and the common weal, persistence in them should be visited with more than ordinary rigour. *Chapter VII* deals with such cases. It follows some of the adcepted principles of the Indian Penal Code and the Criminal Procedure Code.

Clause 21.—Provision has been made in the clause for the removal of unworthy guardians on the lines of the English Act. S. 39 of the Guardians and Wards Act indirectly recognises this power, but, to put the matter beyond doubt, it is desirable to make an express provision.

Chapter IX.—Under s. 29 of the Criminal Tribes Act, Act XXVII of 1871, eunuchs have legal disqualifications in the matter of guardianship, gift and testamentary disposition of property. The principle justifying their exclusion from these ordinary rights of citizenship applies to the case of prostitutes and brothel-keepers. Clauses 22 and 23 of the Bill have been framed to deprive these classes of the above rights. Under the Guardians and Wards Act the Court has ample discretion in the appointment of guardians, and past experience shows the power has been used to keep out prostitutes. Clause 22 of the Bill thus involves no serious hardship to the class. The disqualification provided in clause 23 is of such a limited nature that it will not be felt as a grievance by any member of the class anxious only to make a proper disposition of property.

Clause 24.—The reason of the provision will be apparent.

Chapter XI provides for the trial of offences under the Bill and the procedure to be followed in such trials. Clause 26 relates to details and is based upon English analogy.

Clause 27.—This clause reproduces s. 552 of the Code of Criminal Procedure with enlarged powers to the Magistrate concerned to proceed upon Police report also, and to make a suitable arrangement for the custody and maintenance of the girl.

Clause 28 only makes some of the Exceptions of the Indian Penal Code applicable to offences under the Bill.

The *Schedule* appended sets forth the offences, the Courts by which they will be triable the powers of the Police, and the freedom or otherwise of the parties to compound offences.

NEW ZEALAND.

Signals to be made by vessels approaching Defended ports when inconvenienced by searchlights.

No. 436 (third publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1005 of 1912), are republished :—

Any vessel approaching a defended port in the Dominion of New Zealand when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined :—

(*a*) By flashing lamp, *four short* flashes followed by *one long* flash.

(*b*) By whistle, siren, or fog-horn, *four short* blasts followed by *one long* blast.

Whenever possible, both flashing lamp signals and sound signals should be used.

On these signals being made, the searchlights will be worked so as to cause the least inconvenience, being either doused, raised or their direction altered.

The signals should not be used without real necessity, as unless the vessel is actually in the rays of the searchlight it is impossible to know which searchlight is affected.

Note.

These signals are designed to assist mariners and do not render the Government liable in any way.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1912.

(NOTE.—On the average of the five years ending 1910-11, the area under autumn rice in Bengal represents some 7·0 per cent. of the total area under rice in India.)

Character of the season.—In March the rainfall was generally above the average throughout the province. Towards the end of April the fall was much in excess in Eastern Bengal districts, although not much above the normal in the districts round Calcutta. Sowings were generally normal in most districts. In May and June the rainfall was approximately normal with a tendency to defect. In July the rainfall was below the normal in the Burdwan, Dacca and Chittagong Divisions and it was in excess in the rest of the province. In August the rainfall continued defective in all the districts of the province except in Midnapore, Dinajpur, Darjeeling, Rangpur, Bogra and Tippera, where the fall was in excess of the normal. Excessive rain in the early part of the season and insufficient rain subsequently for a time retarded growth of the crops. Some damage was done by excessive rain and floods on low land in July in places of Rajshahi, Dacca and Presidency Divisions. Injury by insect-pests is also reported from Jessore, Khulna and the Chittagong Hill Tracts. The outturn has consequently been affected in most districts.

Area sown.—The total area sown this year with different *bhadoi* crops is reported to be 6,153,500 acres against 6,294,100 acres last year, the normal area being 6,732,200 acres. Of these, 5,002,800 acres are alone reported to be under autumn (*aus*) rice this year against 5,092,200 acres last year, the decrease being reported to have been chiefly due to extension of jute cultivation.

Outturn.—From the appendix attached to the report it will be seen that Burdwan and Malda report a crop of 108 per cent. of the normal. Pabna reports 105 per cent. and Nadia, Khulna and Howrah the average crop. 24-Parganas, Jessore, Birbhum, Dacca and Bakarganj report a crop between 89 and 98 per cent. Murshidabad, Bankura, Hooghly, Jalpaiguri, Bogra, Faridpur, Chittagong, Tippera, Noakhali and Rangpur report a crop between 75 and 85 per cent. Four districts, viz., Midnapore, Dinajpur, Rajshahi and Darjeeling, report an outturn between 67 and 74 per cent., Only the district of Chittagong Hill Tracts reports a crop of 52 per cent., the low outturn being attributed chiefly to unfavourable weather and injury by insect-pests.

According to the estimates of the District Officers the outturn of the different *bhadoi* crops for the province as a whole works out to 87 per cent. of the normal against the same outturn last year and that of autumn (*aus*) rice only to 88 against 89 per cent. last year.

Preliminary forecast of the bhadoi *crops of Bengal, 1912-13.*

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area. 		Acres.	Acres.	Acres.				
24-Parganas	*Bhadoi* paddy (autumn rice).	73,400	56,400	55,900	67	89	Middle of April. Normal.	Increase in areas under pulses and food-crops is due to timely rain at sowing time. The weather was unfavourable in the Diamond Harbour subdivision at the beginning, but it is now favourable everywhere and the condition of the crops is good on the whole. The outturn will be a little below the normal owing to unfavourable state of weather in Diamond Harbour subdivision which interfered with the growth of the crops.
	Other *bhadoi* cereals ... / Other *bhadoi* pulses ...	3,600	1,400	2,100	67	89		
	Other *bhadoi* food-crops (*i.e.*, vegetables).	5,600	3,000	4,600	58	88

Nadia ...	*Bhadoi* paddy (autumn rice).	491,100	489,800	506,000	87	108	Beginning of May. Normal.	The increase in the area under *bhadoi* paddy is due to timely rainfall. The decrease in area under food-crops is due to increase under *bhadoi* paddy and jute. The weather has been seasonable and the prospects of the crops are favourable. The outturn is expected to be better than last year.

	Total ...	520,000	514,700	529,000	87	100		
Murshidabad.	*Bhadoi* paddy (autumn rice).	229,700	161,400	182,200	75	83	April.	The increase in total area was due to high prices of crops and to timely rainfall. The decrease in area under pulses is due to extension of jute cultivation which is more profitable. The weather has been generally favourable and the prospects of the crops are good. No damage to the crops has been reported except in some low lands by flood.

Jessore ...	*Bhadoi* paddy (autumn rice).	407,300	415,000	340,700	92	92	April. Normal.	The decrease in total area under the crops is due to more extensive cultivation of jute. Want of sufficient rain at the beginning of June retarded the growth of the plants. At present the weather is favourable. Some damage was done to the crops by insects, but the extent of the damage cannot be ascertained now.
	Other *bhadoi* cereals ... / Other *bhadoi* pulses ...	12,200	9,400	9,700	92	92

			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
Khulna ...	*Bhadoi* paddy (autumn rice).	45,800	60,600	25,700	100	100	1st week of April ... Early.	The decrease in area under autumn rice is due to expansion of jute cultivation. Early and constant rain enabled sowings to be made early. The growth of the crops was good at first, but subsequently for a time the rainfall proved insufficient and the condition of the crops fell off. Latterly, however, a renewal of almost daily rainfall has resulted in a good crop of *aus* (autumn) rice. Some damage was caused by flooding and still more by the difficulty of constant rain. Insect-pests were also reported, but did little damage.
	Other *bhadoi* cereals ...	200	1,000	200	100	100	25th April.	
	Other *bhadoi* pulses ...	1,200		800

	Bhadoi non-food-crops other than fodder and fibres.	300	300*	300	100*	100	15th May.	
	Total ...	73,200	86,900	52,000	100	100		
Burdwan ...	*Bhadoi* paddy (autumn rice).	140,000	126,900	125,500	92	108	End of April ...	The decrease in area, which occurred mainly in Sadar subdivision, is due to want of timely rainfall. The weather was not favourable in the Sadar and Asansol subdivisions at sowing time, but the present condition of the crops is hopeful.
	Indian-corn (maize) ...	3,000	3,000	3,000	100	100	June.	
	Other *bhadoi* cereals ...	6,700	2,000	1,900	92	92	May.

	Total ...	161,900	143,600	140,500	92	108	The dates are normal.	
Birbhum ...	*Bhadoi* paddy (autumn rice).	144,100	144,100	102,400	108	92	June. Late.	The decrease in area is due to want of timely rainfall. The weather has not been very favourable. Inadequate and untimely rainfall is the cause of the outturn being below the normal.
	Indian-corn (maize) ...	1,900	1,900	1,200	83	75		
	Other *bhadoi* cereals ...	1,400	1,400	1,100	83	75		
	Bhadoi non-food-crops other than fodder and fibres.	2,800	2,800	1,700	83	75		
	Total ...	150,200	150,200	106,400	104	92		
Bankura ...	*Bhadoi* paddy (autumn rice).	21,900	12,800	12,900	75	83	Middle of June. Normal.	The increase of area sown in respect of certain crops was due to timely rain. The weather and general condition of the crops were good. But the heavy rain at the end of August has damaged the crops to some extent. Hence the decrease in outturn compared with the normal.
	Bajra	800	600	600	67			
	Mandua, marua or ragi	1,100	700	600	67			
	Indian-corn (maize) ...	3,600	2,800	3,200	75

	Bhadoi non-food-crops other than fodder and fibres.	1,200	1,000	900	83			
	Total ...	34,100	22,800	23,100	75	83		
Midnapore	*Bhadoi* paddy (autumn rice).	106,600	70,000	72,600	50	67	May. Normal.	The increase in total area is not very large. It is due to timely rainfall. The facility of sowing by timely rainfall is the cause of increase in area under bajra, marua, and cereals and pulses. The decrease under food-crops was due to want of sufficient rain in February and March. The weather has been favourable and the present condition of the crops is good. There has been no damage to the crops. The outturn is expected to be normal.
	Bajra	6,100	3,000	4,300		67

Hooghly ...	*Bhadoi* paddy (autumn rice).	45,500	25,200	34,000	59	81	May. Normal.	The increase in area is due to early rainfall. The decrease under food-crops is due to excessive rain in some parts and drought in others. The weather has been fair and the growth of the crop is good. There has been no damage to the crop. The present condition of the crop is fair. The outturn is expected to be below the normal owing to want of rain in June.

Rajshahi ...	*Bhadoi* paddy (autumn rice).	300,000	273,800	284,400	90	75	Latter part of April. Normal.	The increase in area under *bhadoi* paddy was due to favourable weather conditions at the time of sowing. The decrease in area under "non-food-crops" was due to revision of estimates by the Subdivisional Officer, Naogaon. The increase under other heads was due to the fact that the form calling for figures under these heads was newly prescribed last year and the local reporters could not ascertain all the figures within the time allowed. More accurate figures have been given this year. The weather conditions have not been favourable.

Dinajpur ...	*Bhadoi* paddy (autumn rice).	130,700	138,000	122,000	100	70	Middle of April. Normal.	The decrease in area under *bhadoi* paddy was due to heavy rains at sowing time. The increase in area under jowar, *bhadoi* food and non-food-crops is due to early rainfall and the decrease under cereals and pulses is due to increase under food-crops. The weather up till now has not been favourable. About four annas of the crop was damaged by flood in Balurghat subdivision. The outturn has fallen below the normal owing to heavy and excessive rainfall.

MALDA	*Bhadoi* paddy (autumn rice).	260,000	261,000	256,000	100	110	End of April	The decrease in area under *bhadoi* paddy was due to the fact that a portion of the land under it was utilised this year for the cultivation of jute owing to high prices obtained for the latter last year. A portion of the area under bajra was utilised for the cultivation of jowar and vegetables. Hence the decrease under the former and increase under the latter.

The weather has on the whole been favourable. Prospects of the crops were hopeful in the beginning, but excessive rain subsequently damaged the crops in Netrakona and Kishorganj. DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop for 1912.

On an average of five years ending 1910-11 the area under jute to which the Bengal jute forecast relates has represented 89·3 per cent. of the total area under jute in British India.

Character of the season.—In the preliminary forecast a review was given of weather conditions up till the end of June. It was pointed out that conditions were generally favourable except for the fact that in Eastern Bengal the crop suffered to some extent from heavy rain in the latter part of April. In July the rainfall in the Western and Northern Bengal districts was generally above normal; but in the Eastern Bengal districts there was a tendency to defect. In August, except in a few districts, the tendency for the rainfall was to be under normal. The result of this was that there were no river floods such as occurred last year. Rivers were late in rising, and consequently the harvest was later this year than last. The crop throughout the province has been a good one; but weather conditions have been more favourable in what are known as the *deshi* districts than in Eastern Bengal. Sufficient water appears to have been available for steeping.

Acreage.—The final figures for acreage show an increase in Bengal of 202,250 acres. Bihar returns an increase of 40,222 acres, and Assam an increase of 4,922. The grand total of increase for the three provinces is, therefore, 247,394 acres and the percentage of increase 7·9 per cent.

Outturn.—The final total outturn for Bengal only works out to 8,502,135 bales. Bihar returns an increase of 87,412 bales and Assam a decrease of 12,930 bales.

The percentage of outturn for nearly every district is in excess of that of last year. This is particularly so in the case of the *deshi* districts, where the crop this year is generally regarded as being exceptionally good. It is possible, however, as things have turned out, that the crop in Eastern Bengal has been underestimated. The underestimate will probably be found in the percentage of outturn. The question was debated at the conference of District Officers which was held at Dacca on the 14th instant and at which the Fibre Expert was also present. Both the District Officers and the Fibre Expert were of opinion that the percentage of outturn given was ample. From the figure, however, furnished by the Chamber of Commerce for last year's exports from Calcutta and Chittagong and the quantity purchased by mills from the crop of the season, it is clear that either the figure for the total acreage of the province has been underestimated, or else 3 bales per acre cannot be regarded as a correct normal outturn. Steps have already been taken to have the district acreage figures tested by means of punchayats, and I intend to have the punchayati figures thoroughly verified before the preparation of the next preliminary forecast. We shall then be in a position to say what the correct normal figure for outturn per acre ought to be. From the information which I have so far been able to collect, it appears that the so-called normal figure of 3 bales per acre is under the mark for the leading jute districts, and it is here that the chief error made in the past will be discovered. The figures which have been given for the outturn of the *deshi* districts and the districts of the Rajshahi Division are probably approximately correct; but the percentage of outturn for the districts of Eastern Bengal is probably an under-estimate.

Director of Agriculture, Bengal.

APPENDIX I.

Final Forecast of the Jute Crop of Bengal, 1912.

DISTRICT.	Estimated normal area under jute.	Estimated area under jute—		Estimated outturn, as a percentage of the normal yield per unit of area—		Estimated total yield—		Date by which harvesting generally commenced, and whether that date was early normal or late.	REMARKS BY DISTRICT OFFICERS.

1	2	3	4	5	6	7	8	9	10
	Acres.	Acres.	Acres.			Bales.	Bales.		
24-Parganas ...	76,600	85,000	89,200	90	110	229,500	294,360	Middle of August; normal.	The increase of area sown as compared with that of last year is due to the high price of jute and to the timely rainfall. The weather was all along favourable and was congenial to the growth of the crop. The weather and rainfall were favourable; hence the outturn was above the normal.
Nadia ...	49,400	47,400	91,000	88	95	125,136	259,350	Beginning of August.	The increase of area shown is partly the result of more careful enquiry by panchayats and partly due to actual increase on account of the high price of jute last year and to favourable weather conditions this year. The decrease in the estimated outturn as compared with the normal is due to excessive rainfall in June and July and damage done by insect-pests.
Murshidabad ...	39,800	27,700	40,000	75	95	62,325	114,000	August; normal ...	This year's area has been arrived at after a proper census was taken of the crop by the panchayats, and duly checked by the Department of Agriculture. The weather was all along favourable from June to August.
Jessore ...	123,500	93,000	165,000	90	110	251,100	544,500	Towards end of August; normal.	The increase in area is due to the high prices received. The weather was favourable. Last year's outturn was much under-estimated.
Khulna ...	18,300	16,800	38,100	95	105	47,880	120,015	Middle of September; normal.	The weather was at first very favourable, and sowings were made on a much more extensive scale than even before. The subsequent growth of the plants was somewhat impeded by constant heavy showers which also made it difficult to weed and thin the fields at the proper time. During May a period came of about ten days without rain, and insects-pests appeared. In many instances the growing point of the plant was injured and withered. When rain recommenced, the weather again became very favourable, the insects disappeared and the plants threw up branches from below the tip. These branches have made surprisingly good growth, but are neither as long nor as thick as the plants are said to have been last year. According to all practical cultivators last year's outturn was really marvellous and must have been about 50 per cent. above the district normal. This year the average outturn will be a little below that of ordinary years in Khulna district, but a little more than the provincial normal of 15 maunds per acre. Land on which jute failed and which was not subsequently put under another crop has been retained in the estimate of area and allowed for in the estimate of outturn. But areas where the land was reploughed and other crops put in have been omitted altogether.
Burdwan ...	16,500	13,500	15,000	95	105	38,475	47,250	Middle of August; normal.	The increase of area as compared with that of last year is due to the increased cultivation of jute on account of rise in the price of jute and favourable rainfall at the sowing time. The increase of area in comparison with the area shown in the preliminary forecast is due to the collection of correct statistics through the agency of panchayats and adoption of those figures. The weather was favourable and beneficial to the crop. The increase in the outturn is due to favourable weather and timely rainfall.
Midnapore ...	10,400	7,000	11,000	80	80	16,800	26,400	Middle of August; normal.	There has been an increase of 600 acres over the normal area, owing to rise in the price of jute and the facility of sowing by timely rain. The weather was favourable throughout, and the condition of the crop good.

Hooghly ...	38,400	42,100	40,000	81	110	116,883	196,000	Second week of August; normal.	The increase in area was due to seasonable rain at the sowing time and to the increase of the price of jute. The character of weather was good from June to August; hence the condition of the crop was good. The outturn is better than that of last year owing to most timely rainfall.
Howrah ...	42,100	24,000	25,000	65	110	46,800	82,500	Middle of July; normal.	The weather was on the whole favourable. The crop was however to some extent injured by insects.
Rajshahi ...	88,200	78,700	80,900	51	90	120,400	218,450	Ditto ...	Increase in area as compared with that of last year is due to increase of cultivation on account of the high price of jute last year. The weather was not altogether favourable. Flood caused some damage to the crop in the Sadar and Naogaon subdivisions. Insufficient rain and flood in some places caused the outturn to fall below the normal.
Dinajpur ...	116,800	116,800	116,800	100	90	350,400	315,360	Ditto ...	Owing to excessive rain the fields were not weeded out properly, and this affected the crop to a certain extent.
Jalpaiguri ...	106,300	94,800	94,800	80	85	227,500	241,740	Second week of August; normal.	The weather in the beginning was favourable, but there was too heavy rainfall later on. The short percentage is due to unseasonable rainfall.
Darjeeling ...	2,900	4,500	5,000	66	70	8,910	10,500	Middle of August; normal.	Heavy rainfall in June and July retarded the growth of the crop.
Rangpur ...	302,000	299,600	290,000	91	90	817,900	783,000	Normal	Owing to excessive rain at the sowing season some fields were spoilt. Seasonable rain helped the growth of the crop.
Bogra	115,000	130,000	130,000	75	80	292,500	312,000	End of July; normal.	
Pabna	180,000	201,500	220,000	100	105	604,500	693,000	Low land: end of June; normal. High land: middle of July; normal.	The increase of area over that of last year is due to high prices of last season and timely rain this year. The fall has been fairly good during the season. But the river beginning to fall at the end of July, some apprehension was felt as to the facilities for retting and the quality of the fibre. The river rose again within two weeks and improved the prospects.
Malda	33,000	30,000	38,000	70	100	63,000	114,000	From the middle of July; normal.	The increase in the area sown this year as compared with that of last year is due to timely rainfall and to the fact that the high price prevailing last year has induced the cultivators to sow more jute than last year. The weather was favourable throughout; hence the outturn is better than last year. A normal outturn is expected this year.
Dacca	145,000	184,000	188,000	76	95	425,400	535,800	July; early.	
Mymensingh ...	707,700	758,000	756,000	94	95	2,137,600	2,154,600	Middle of July; early.	The area as returned in the preliminary forecast has been retained. The weather since the preliminary forecast was on the whole favourable. Much damage was done at the time of sowing and weeding by heavy rains. Excessive rain during the sowing time flooded the sowing lands and ruined much of the crop. Subsequent favourable weather has not been sufficient to raise the outturn to normal. For this reason the outturn is reported from Kishanganj, Netrokona and Sadar to have fallen below the normal.
Faridpur ...	125,000	129,500	130,000	75	95	313,900	427,500	Beginning of July; normal.	The increase of area as compared with the preliminary forecast is due to further enquiry showing that some lands under the crop had been omitted from the Madaripur Subdivision. The early rain favoured the sowing on high lands. The crop was, however, injuriously affected in low lands by the rain.

The young jute was adversely affected by the rain in April and never fully recovered Since then there has been a tendency in some places for it to suffer for want of moisture.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 30th September 1912.

Summary.—During the week under report the rainfall was generally light throughout the province. More rain is urgently wanted for the growth of winter rice in most districts. The harvesting of autumn rice has been finished and that of other *bhadoi* crops is proceeding. The outturn of autumn rice is reported to be good. The transplantation of winter rice is almost over; but prospects are only fair as more rain is wanted. The harvesting of jute continues. The condition of sugarcane is fair. The preparation of fields for *rabi* crops is proceeding. The average price of common rice for the province has slightly fallen as compared with that of the previous week. Cattle-disease is reported from six districts, but is confined to particular localities.

No. 5776.—The 1st October 1912.—In exercise of the power conferred by section 19 of the Indian Treasure-trove Act, 1878 (VI of 1878), the Governor in Council is pleased to make the following rules, for the Presidency of Fort William in Bengal, to regulate proceedings under the said Act, in supersession of the rules published under Eastern Bengal and Assam Government Notification No. 586., dated the 4th January 1908 (at page 45 of Part II of the *Eastern Bengal and Assam Gazette* of the 8th *idem*), and under Bengal Government Notification No. 870, dated the 15th February 1912 (at page 370 of Part I of the *Calcutta Gazette* of the 21st *idem*):—

Rules.

Definitions.

1. In these rules—

"the Act" means the Indian Treasure-trove Act, 1878, and

"section" means a section of the Act.

Publication of notification.

2. Every notification under section 5 (*a*) shall be published at the Collector's cutcherry, subdivisional cutcherry, Munsif's cutcherry and police-station within the jurisdiction of which the treasure was found, and also at some conspicuous spot in the village in which it was found.

Collector's report.

3. On receipt of any notice under section 4, or on receipt of information from any person other than the finder, that treasure has been found, the Collector shall report the fact direct to Government and to the Superintendent, Archæological Survey, Eastern Circle, stating—

(1) the name of the finder;

(2) the nature of the treasure and the number of coins (if any);

(3) the approximate value of the treasure;

(4) the date of the finding of the treasure;

(5) the origin, surroundings and exact nature of the find; and

(6) whether, in the case of treasure consisting of coin, it is recommended—

(*a*) that Government should acquire the whole of such treasure, or

(*b*) that for any special reasons, such as the largeness of the quantity found or the coins being known to be of merely metal value, Government should not acquire the whole of such treasure, but only a portion thereof, or

(*c*) that Government should not acquire any portion of the treasure.

In the event of such recommendation being made, if the find is small, all the coins shall be submitted to Government. In the case of large finds, only a few specimens of each type shall be submitted. The expert who examines the coins may correspond direct with the Collector, and request that in the case of large finds all the coins, or such number of them as he may require, be submitted to him.

Proceedings when finder does not give notice

4. If the information of the finding of treasure is given by a person other than the finder and the Collector is satisfied that the information so given is substantially correct, he shall, in addition to the notice required under section 5, serve a notice on the finder to show cause why he should not be prosecuted under section 20. The Collector may also serve a notice on the owner to show cause why he should not be prosecuted under section 21 if he has reason to believe that an offence under that section has been committed by the owner. After the service of such notice or notices, as the case may be, the Collector shall take such further proceedings in the matter as may be deemed expedient.

Cost of service of notice

5. All notices issued under section 5 (*b*), or in pursuance of any rules framed under the Act, shall be served at the cost of Government.

Acquisition of treasure

6. The acquisition, under section 16 of the whole or any part of the treasure by the Collector, whether such treasure consists of coins or not, shall be subject to the orders of Government.

Examination of coins and report by experts

7. Coins submitted to Government by Collectors shall be sent for examination to experts, who shall submit their reports to Government, in Forms A and B appended to these rules, stating the number and nature of the coins and their probable numismatic value. They shall also advise Government whether the coins or any part of them should be acquired. Ordinarily all coins pronounced by the experts to be rare specimens shall be acquired by Government. Copies of the reports thus received shall be forwarded to the Superintendent, Archæological Survey, Eastern Circle, for inclusion in the summary referred to in rule 15.

Examination and acquisition of treasure not coins

8. (1) In the case of treasure not consisting entirely of coins, it shall be the duty of the Superintendent, Archæological Survey, Eastern Circle, on receiving the report mentioned in rule 3 above, to arrange for an inspection of the treasure either by himself or by a Deputy, whenever it appears to him, from the report in question, that such inspection is desirable; and in any case to advise Government without delay as to the desirability of acquiring the treasure under section 16, in the event of an ultimate declaration by the Collector under section 9.

(2) If Government decide to acquire such treasure, whether on the report of the Superintendent, Archæological Survey, Eastern Circle, or otherwise, Government shall so inform the Collector, who, after making the said declaration and complying with the provisions of section 16, shall, as soon as possible, forward the treasure so acquired either to the Indian Museum in Calcutta or to any other centre which Government may direct.

Acquisition of old coins, not treasure-trove

9. All Collectors are empowered to purchase, otherwise than when proceeding under the provisions of the Act, any coins, whether gold, silver, or copper, which appear to be old and not of British mintage, when they are less than Rs. 10 in value, on payment of a sum equal to the value of the materials of the coins, together with one-fifth of such value. Coins so purchased shall be submitted to Government in the General Department for distribution in the manner prescribed in rule 12.

Explanation.—Such coins include, for example, coins struck at Calcutta, Murshidabad, Benares, Surat or Arcot in the name of the Emperor Shah Alum, dated 19th Juloos.

Proceeds of fines and sales to be credited to Government.

10. (1) All fines levied under the Act shall be credited to the head "Treasure Trove," subordinate to head XXV—Miscellaneous, and any treasure which vests in Government under section 20 or section 21 shall, unless it be such as it is thought advisable for Government to retain, be sold in the manner described in sub-rule (2) with reference to the sale of surplus coins, and the proceeds shall be credited to the above head.

(2) Any surplus coins which it is considered desirable to retain, after the distribution prescribed in rules 12 and 14, shall be sent to the Indian Museum and there kept for sale. Notices containing particulars thereof shall be published quarterly in the local Gazette and the *Gazette of India*, copies of the notices being sent to the Asiatic Society and to the other institutions mentioned in rule 12. If any coins so kept for sale remain unsold, Government may, at the end of each year, pass orders for the sale thereof by public auction.

Subject to be noticed in the Land Revenue Annual Report

11. All Collectors shall append a paragraph to their Land Revenue Annual Reports, stating whether, during the year under report, any notices have been presented under section 4 or any proceedings taken before the Magistrate under section 20 or section 21 or any action taken under rule 9. All Commissioners shall, in their own reports, mention the results of the working of the Act as reported by Collectors.

Distribution of coins acquired

12. One coin, or more coins than one, of the same variety, acquired by Government shall, subject to the proviso laid down in rule 13, be distributed to the following fourteen cabinets in the order in which they are named below. The distri-

bution shall be intimated to the Superintendent, Archæological Survey, Eastern Circle:—

(1) The Indian Museum.
(2) The Madras Museum.
(3) The Provincial Museum, Lucknow.
(4) The Lahore Museum.
(5) The Nagpur Museum.
(6) The Public Library, Shillong.
(7) The Archæological Museum, Poona.
(8) The Peshawar Museum.
(9) The Quetta Museum
(10) The Ajmere Museum.
(11) The Rangoon Museum.
(12) The Asiatic Society of Bengal.
(13) The Bombay Branch, Royal Asiatic Society.
(14) The British Museum.

Accumulation of duplicates to be avoided

13. It shall not be necessary to present coins to an institution which already possesses exactly similar specimens. To facilitate the selection and to avoid the accumulation of duplicates, Government shall be furnished by each cabinet with a catalogue of the existing collections, which shall also be published.

If the publication of catalogues cannot be arranged for, hand lists shall be printed, giving such details of the coins in each cabinet that they can be recognized.

Retention of specimen coin by non-official examiner

14. No official who is entrusted with the examination of coins as part of his ordinary duties shall, in any circumstances, retain a specimen of any coin. Non-official examiners may, however, retain one specimen only of each variety; provided that specimens remain over after all the cabinets named in rule 12 have been supplied. In such cases a statement shall be furnished to Government by the examiner or examiners concerned.

Annual report and summary

15. The Superintendent, Archæological Survey, Eastern Circle, shall include in his annual report a brief summary of the results of the examination of coins and other treasure-trove during the year under review. The summary shall show the total number of coins dealt with during the year, their classification by metal and also, roughly, by the series to which they refer. It shall also give a short account of any notable finds, whether of coins or of other treasure-trove, and the distribution of coins during the year shall be shown in a separate table. Form C appended to these rules shall be used for this purpose.

Lights at the entrance of the Mandavi River.

No. 465 (first publication).—The following particulars, etc., relative to the above, issued by the Director of the Royal Indian Marine, Bombay, in Notices to Mariners (No. 197M of 1912), are republished :—

Subject.—As the sand bank at the bar is tending to increase towards the south thus approaching the sailing line through the Malim Campal marks, Mariners are advised that though there is the same depth of water as before (minimum 11′ in low tide) on this line, it is prudent to enter with the marks a little open, thus keeping the light at Malim to the south of that at the Campal. In order to obtain greater depth (minimum 12′ in low tide) the Malim light should bear between the two pillars painted white which are on the margin of the circular terrace where Banastarim gun is and which is about 30 meters to the south of the Campal Light. If the Malim Campal sailing mark is to be followed, it is necessary to prevent a vessel yawing to port or the north side.

At night it will suffice to keep the red lights a little open, keeping the higher one Malim a little to the north of the other.

AUSTRALIAN PORTS.

Caution when approaching Australian ports.

No. 470 (first publication).—The Portmaster, Brisbane, has given Notice (No. 10 of 1912) as follows :—

In connection with periodical exercises or manœuvres, or in the event of relations becoming strained between Great Britain and any Naval Power, an Examination Service may come into force at the ports or localities mentioned at the end of this notice.

Masters are warned that before attempting to enter any of these ports they must, in their own interests, strictly obey all instructions given to them by the vessels which will be charged with the duty of examining ships desiring to enter the ports, and allotting positions in which the ships shall anchor. In case of fog, they should on no account attempt to enter before receiving permission from the Examination Officer.

The institution of an Examination Service at any port will never be publicly advertised, but at all times when the relations of Great Britain with foreign powers are known to be in a state of tension, especial care should be taken in approaching the ports, by day or by night, to keep a sharp look-out for the Examination Steamer, and to be ready to "Bring to" at once when hailed by her or warned by the firing of a gun.

If the entrance to a port is closed, three red vertical lights by night, or three red balls by day, will be exhibited in some conspicuous position, in or near to its approach, and as far as possible notice of this fact will be given by look-out vessels in the offing.

If the Examination Service is in force the Examination Steamer will be distinguished at night—

(*a*) When the port is closed, by three red vertical lights.

(*b*) When the port is open, by three white vertical lights.

The pilots attached to the ports will be acquainted with the regulations to be followed.

The Astronomical positions are only approximate unless seconds are given. The bearings are given both True and Magnetic.

REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT IN BENGAL DURING THE YEAR 1911-12.

NOTIFICATION.

No. 356T.—S.R.—The 30th September 1912.—The following extracts from the Report of the Commissioner of Excise and Salt on the administration of the Excise Department in Bengal during the year 1911-12 are published for general information with a memorandum on the report.

H. L. STEPHENSON,
Secy. to the Govt. of Bengal.

FINANCIAL DEPARTMENT.

Memorandum on the Report of the Commissioner of Excise on the Administration of the Excise Department in Bengal during the year 1911-12.

THE following extracts from the Excise Commissioner's report for 1911-12 are published for general information. The report has been prepared for the Presidency of Bengal as it now stands. The provincial figures of former years have therefore become useless for purposes of comparison which can only be made between districts or divisions.

2. The total excise revenue for the year was Rs. 1,33,89,707, an increase of Rs. 7,80,382 on the previous year. The increase is accounted for under the heads Country spirit (Rs. 3,33,013), Opium (Rs. 1,90,570), Ganja (Rs. 1,78,719) and Pachwai (Rs. 72,493), and the reasons for the rise in each case may be summarised briefly.

3. There are two systems for the supply of country liquor—the distillery system and the outstill system. Under the former there are two kinds of distilleries—contract and central; in both the liquor is made from *mahua*, molasses or *gur*. Under the contract system the private contractor supplies the liquor at fixed prices; it is stored in bonded warehouses and issued under Government supervision at fixed reduced strengths to the retail vendor. Liquor is at present supplied to the Presidency Burdwan and Rajshahi Divisions from contract distilleries at Asansol, Konnagore and Marhourah. Central distilleries are Government buildings and private distillers are allowed to manufacture liquor in them on payment of certain fees and under the supervision of Government officers; the liquor is issued on payment of duty at fixed strengths, but the price charged to the retail vendor is fixed by the private distiller. There are central distilleries at Russa, Dacca, Faridpur and Barisal. Under the outstill system the retail vendor manufactures his liquor for himself and is only subject to inspection by Excise officials. The distillery system has many advantages over the outstill system, not the least of which is that the wholesomeness of the liquor can be secured and the actual consumption in L.-P. gallons can be ascertained. Of the two forms of the distillery system, the Excise Commission strongly favoured the contract, and proposals for the extension of this system to the Divisions of Dacca and Chittagong are now under the consideration of Government.

The total increase in consumption in the distillery area was 20,242 gallons L.-P. Calcutta alone shows a rise of 10,421 gallons, which is due partly to the substitution of country spirit for cheap foreign liquor, and partly to the large influx into the town at the time of Their Imperial Majesties' visit. Even with these contributing causes the increase is much below the average increase of the last two years. In the Rajshahi Division, though there was some increase in consumption, the distillery liquor has not yet overcome the prejudice that always accompanies its first introduction, and the consumption has not yet attained what may be regarded as its normal limits, the place of country liquor being temporarily taken by other intoxicants. In the Burdwan Division there was a decrease in consumption, and in the Dacca Division the small increase is attributed chiefly to the ousting of Indian rum and foreign liquor by country spirit and partly to the increase in the population of Dacca town. The net excise revenue per 10,000 of the population in the Dacca Division has slightly decreased. The increase in revenue in the distillery areas (Rs. 3,30,906) is much greater in proportion than the increase in consumption. The increase from duty, which represents the increase in consumption, was Rs. 92,509, while the increase from license fees, which means an increase of cost to the consumer, was Rs. 2,38,544. In the outstill area the total increase in revenue was only Rs. 2,107.

4. There were six less shops for the retail sale of country liquor than in the previous year, and the increase in receipts under this head may be regarded as satisfactory, inasmuch as it has been obtained not by an increase in consumption of intoxicants but mainly by an increase in the cost to the consumer.

5. There is one district, Darjeeling, that demands separate notice, especially as considerable attention has been attracted to the liquor trade there by the recent murder of a vendor. The circumstances of Darjeeling are not comparable with those of any other district at present in Bengal and the excise receipts are enormously greater in proportion to the population. But the difficulties of excise administration in Darjeeling with its hill population and with the neighbouring States of Nepal, Bhutan and Sikkim are very great, and a comparison of consumption and excise revenue in proportion to the population with districts in Bihar and Chota Nagpur is by no means unfavourable to the excise administration. The question has received the constant attention of excise officers and considerable progress has been made in controlling the traffic. The outstill system was abolished in 1906, and at that time the consumption of country liquor was estimated to be 60,975 L.-P. gallons, giving an average of 244 gallons to every 1,000 inhabitants, while the average strength of the liquor sold was 25° U.-P. The actual consumption could only be guessed; there is, however, no difficulty in ascertaining the average strength of the liquor sold. The liquor is now supplied from the Asansol distillery, and since 1906 the figures for consumption have been—

	L.-P gallons	Consumption per 1,000 of population in L.-P gallons
1906-07	39,863	160
1907-08	44,920	180
1908-09	44,657	179
1909-10	38,966	156
1910-11	44,863	171
1911-12	51,888	195

The highest figures were reached in the year under review, but these are still considerably below the probable underestimate of 1905-06. There has, however, been an increase in bulk gallons as the average strength of the liquor issued now is 66° U.-P. and the major portion of it is issued at 70° U.-P. Apart from the desirability of substituting a weak for a strong liquor the facilities for smuggling cheap liquor from Sikkim have forced Government to supply a wholesome cheap liquor by means of a perferential rate on liquor issued at 70° or more U.-P. A portion at least of the rise in consumption of distillery liquor may be attributed to the ousting of the smuggled liquor, and the substitution of wholesome liquor for unwholesome is to some extent a gain; but the Excise Commissioner has been asked for a more detailed report on the actual causes of the large rise in last year's consumption. The consumption of opium and *ganja* in this district has also risen during the last year; in the case of opium this rise is almost entirely due to the presence of the followers of the Dalai Lama and other exiled Tibetans, while the rise in *ganja* is less than in other districts of Northern and Eastern Bengal, and it is proposed to check the general rise in the consumption of *ganja* by raising the rate of duty.

6. The consumption of opium in the Province increased by 43 maunds 19 seers and the total revenue by Rs. 1,90,570. The largest increase in consumption was in Calcutta (8 maunds 4 seers) and was principally due to supplies to the military authorities. Of the total increase in revenue, only Rs. 37,528 was from duty on increased consumption and the remainder was due to higher license fees, especially in Calcutta, where the increase under this head amounted to Rs. 1,15,703. The question of controlling the sale of opium has recently been the subject of a Resolution by the Government of India, and the Local Government have already taken such measures as appear feasible to strengthen the control. The number of druggists' permits has been reduced from 1,257 to 771 and 126 shops have been abolished from 1st April 1912. In five of the principal consuming districts the issues to shops are carefully limited to the ascertained reasonable demand of the locality, and the number of prosecutions for illicit sale and possession of opium has considerably increased. It is believed that the increased vigilance exercised has been successful to a large extent in forcing smugglers to obtain their supplies elsewhere, and the question of dealing with the illicit trade by by inter-Provincial co-operation and a uniform scale of prices is under consideration.

7. Of the increased income under the head *ganja*, Rs. 1,25,026 was obtained from license fees, the highest rise, Rs. 53,822, being in Calcutta. The increase in consumption was 53 maunds, almost entirely in Eastern and Northern Bengal, and is attributed to agricultural prosperity in these areas. A proposal is under consideration to increase the duty while lowering the license fees so as to obviate the temptation to cut prices and recoup the license fees by means of increased sales.

8. In the case of *pachwai*, the increase in vend fees was most marked in the Burdwan Division, where there was a fall in the consumption of country liquor. The rise is said to be due to the fall in the price of rice.

9. The statistics of conviction for drunkenness are of little use in estimating the extent of the drink habit because the number of prosecutions depends entirely upon local circumstances, but the report gives no reason to suppose that the habit of drinking is extending. Some rise in the consumption of stimulants may be expected as the standard of living rises and an increased income from excise is perfectly legitimate if it is obtained by increasing the cost of the stimulant to the consumer. But caution is necessary lest in the attempt to control the consumption of one form of stimulant a taste is created for a cheaper and possibly more harmful kind. The rise in the demand for various forms of cocaine supplies a warning that cannot be neglected, and is perhaps the most noticeable feature in the field of excise in the last few years. The possession of this drug by private individuals except on a *bonâ fide* medical prescription is absolutely forbidden; its import by means of the post is prohibited and its import by other means is very closely controlled and its sale by chemists and druggists is very strictly limited. Nevertheless the profits of illicit sale are so great that it is very extensively smuggled into the Province chiefly by persons employed on ships entering the port of Calcutta. In the year under review the number of convictions for illicit possession has risen from 290 to 604, and in Calcutta alone 310¾ ounces of the drug were seized. The drug is so valuable in proportion to its bulk and is so easily smuggled that the amount passed in undetected must be very large, and unfortunately in the past the punishment awarded to convicted offenders has not been sufficiently deterrent. The evil effects of the cocaine habit are so pronounced that its smuggling is perhaps the most serious of all excise offences, and the extent of its prevalence necessarily influences the excise policy of Government.

From—JAMES DONALD, ESQ., M.A., I.C.S., Commissioner of Excise and Salt, Bengal,

To—The Secy. to the Govt. of Bengal, Financial Dept.

I HAVE the honour to submit the following report on the administration of the Excise Department in the Presidency of Bengal for the year 1911-12. In accordance with Government Order No. 155—6P.—D., dated the 16th April 1912, this report has been prepared for the Presidency as now constituted.

Local Excise Committees.

7. Local committees, consisting of both official and non-official members, were formed in the following towns, which have a population of 20,000 or over, to consider and advise the Collector on the proposals regarding the licensing, number and situation of liquor shops (country spirit, foreign liquor, *pachwai* and *tari*) for the year 1912-13 :—

1. Burdwan.	7. Serampore.	13. Krishnagar.
2. Asansol.	8. Bhadreswar.	14. Santipur.
3. Bankura.	9. Baidyabati.	15. Berhampur.
4. Vishnupur.	10. Titagarh.	16. Dacca.
5. Midnapore.	11. South Subarban.	17. Darjeeling.
6. Chinsura.	12. Garden Reach.	18. Chittagong.

Local and municipal bodies were also consulted in the matter of sites of liquor shops in the Presidency and Burdwan Divisions, while in the Dacca, Chittagong and Rajshahi Divisions they were consulted in respect of every kind of excise or opium shops. No new shop was opened without consulting local opinion and without an ascertained local demand. * *

* * * * * * *

In Calcutta no local committee was appointed during the year, as the licenses for the sale of country spirit and for the retail "on" and "off" sale of foreign liquor had been settled for three years with effect from the 1st April 1910. The sites were considered and approved by the Committee which sat in 1909-10.

Actual receipts.

10. Deducting the advance collections (Rs. 8,39,845) for 1912-13 and adding the revenue (Rs. 8,62,457) for 1911-12, which was collected in advance in 1910-11, the actual receipts on account of 1911-12 were Rs. 1,34,12,319 against Rs. 1,25,80,236 (after similar adjustment) of the preceding year, showing an increase of Rs. 8,32,083, or 6·6 per cent.

* * * * * * *

Revenue under different heads

12. There was an increase under every head except foreign liquor, *majum* and denatured spirit. The largest increase of revenue (Rs. 3,33,013) occurred under the head "country spirit." Opium comes next with an increase of Rs. 1,90,570, followed by *gunja* (Rs. 1,78,719), *puchwai* (Rs. 72,493), and *siddhi* (Rs. 21,723). The largest decrease occurred under foreign liquor, Rs. 35,295. The fluctuations in the revenue from the different articles will be discussed in detail under the appropriate heads.

Demand and collection.

13. * * * * Taking the population of the Presidency of Bengal according to the recent census to be 45,323,492, the incidence of excise revenue is 4 annas 8 pies per head against 4 annas 5 pies in the previous year.

Result of settlements for the current year up to 31st May 1912.

14. * * * * There has been a net decrease of Rs. 47,702 under the head "Country spirit." The decrease is heavy in the districts of Hooghly, the 24-Parganas, Dinajpur, Rangpur and Midnapore. In Hooghly and the 24-Parganas there was a very marked rise in the fees at the auctions in March 1911. In the 24-Parganas, immediately after the auctions in March 1911, a large number of petitions was filed for reduction of fees, and it was then observed that the fees had been allowed to rise to a limit which made it difficult for vendors to work on honest lines at the maximum price fixed for country spirit. No reduction of fees was, however, allowed, and instructions were issued to the district officers to check the tendency to raise fees indefinitely beyond the figures at which shops could be expected to work honestly. In Midnapore, too, the fees were very high

in 1910-11, and the present decrease has resulted from the settlement of shops at reasonable fees. In Dinajpur and Rangpur the prices of shops were very high last year, and this fact as well as the result of the working of the shops was taken into consideration in fixing the upset prices for the year 1912-13. There was little competition and bids did not much exceed upset prices. Under the head "Other excisable articles" there has been a net increase of Rs. 4,048. The increase is large in the districts of Bankura, Chittagong, Faridpur, Malda and Burdwan. In Bankura and Burdwan the increase was greatest from *pachwai* license fees, due to better competition at the settlements, which was the result of the good business which, with good agricultural conditions, prevailed during the year. In Chittagong the increase was fairly well distributed under all heads, *ganja* showing the largest increase. In Faridpur, too, *ganja* fees brought in the largest increase. The increase in *ganja* fees in these two districts was due to the larger sales of the drug in 1911-12 as a result of the better agricultural conditions prevailing during the year. In Malda the largest increase occurred in *tari* license fees and was due to better competition at the sales.

SECTION II.—COUNTRY LIQUOR.

* * * * * *

Country Spirit.

Systems.

15 There was no change in the systems of supply of country spirit during the year 1911-12. The contract supply system was in force in the Burdwan, Presidency and Rajshahi Divisions, the central or sadar distillery system in the Dacca Division, while the outstill system continued in the Chittagong Division.

Consumption of contract and distillery spirits.

16. The total consumption of contract and distillery spirits was 796,784 gallons L.-P. as compared with 776,542 gallons L.-P. in 1910-11, an increase of 20,242 gallons L.-P. The Presidency, Rajshahi and Dacca Divisions contributed an increase of 26,829 gallons, while in the Burdwan Division there was a decrease of 6,871 gallons. The fluctuation in the consumption in the Presidency Division was nominal in all districts and the increase was almost entirely in Calcutta, where the consumption was 10,421 gallons in excess of that of the previous year. This increase in Calcutta was far below that of each of the two previous years; and when it is remembered that there was a large influx of people into the city at the time of His Majesty the King-Emperor's visit, it cannot be regarded as other than the normal increase which follows the progressive rise in the population. The displacement of cheap foreign spirits by country spirit, to which reference was made in last year's report, is also accountable to some extent for the increase.

In the Rajshahi Division there was an increase in all districts except Jalpaiguri and Pabna. This was a result chiefly of the general prosperity that prevailed. Agricultural conditions were very favourable and the price of food-grains remained at a low level throughout the year. Jalpaiguri would have shared in the general increase in the division but for the smuggling of liquor across the border from Bhutan. When the contract supply system was first introduced into the Rajshahi Division (excluding Darjeeling) in 1908-09 it was estimated that the total annual consumption would amount to 150,000 L.-P. gallons. This figure has not yet been reached, and only 133,889 gallons were consumed in the area during the year 1911-12. There was a small increase, but there would have been a greater rise in licit consumption had not inflated license fees led to the undue enhancement of retail prices. The settlements of the present year have been made on more reasonable lines, and with other conditions favourable a greater rise in the consumption during the current year is not unlikely. Of the total increase of 12,153 in the whole division, the Darjeeling district alone accounts for 7,025 gallons. Apart from the general prosperity of the district which contributed to the increase, the demand for liquor was increased by the employment of labour on construction work at Takdah.

In the Dacca Division, which, too, enjoyed general agricultural prosperity, all districts shared proportionately in the total increase (4,679 gallons). The abolition of the right to sell Indian rum in country spirit shops, and the raising of duty on foreign liquor which resulted in consumers taking to country spirit, also contributed to the increase. The increase in Dacca occurred mainly in the town of Dacca itself, and is undoubtedly due to the increase in the population of that place. The figures of consumption have increased gradually ever since 1905, when Dacca was raised to the position of capital of the province of Eastern Bengal and Assam.

The falling off in the Burdwan Division occurred in the districts of Burdwan, Bankura and Midnapore. In the other districts the fluctuations were small. The decrease in Burdwan (3,182 gallons) was mainly in the Asansol subdivision, and was due to depression in the coal trade. In Bankura illicit dealings in *pachwai* and country spirit, which cannot be effectively dealt with by the existing staff, and the larger consumption of *pachwai* were the principal reasons for the decrease. In Midnapore there was a partial failure of the rice crop and consequent dullness in the export trade in rice, the trade on which the material condition of the people of the district largely depends. But the main cause of the falling off in consumption was a combination among vendors to sell at the fixed maximum prices. In the previous two years there was great rivalry between them, and they attempted to ruin one another by cutting prices very low. The losses they sustained resulted in a general combine last year.

Total revenue from country spirit.

17. The total revenue from country spirit amounted to Rs. 61,81,642 as compared with Rs. 58,48,629 in 1910-11.

Revenue under contract supply and distillery systems.

18. The total revenue; license fees and duty under the contract and distillery systems was Rs. 60,84,239 against Rs. 57,53,333, an increase of Rs. 3,30,906. The increase was mainly from license fees (Rs. 2,38,544), and was shared in by all districts except Bankura, Midnapore and Nadia. The increase from duty was Rs. 92,509 and follows the increase in consumption which I have already explained. The increase in license fees was greatest in the Rajshahi Division (Rs. 1,29,158), the Dacca, Burdwan and Presidency Divisions coming next in order with increases of Rs. 48,141, Rs. 34,123 and Rs. 27,122, respectively. In the Rajshahi Division the gradual dying out of the prejudice against the contract system and favourable agricultural conditions led to keen competition at the sales of March 1911, and resulted in the large increase under this head. In the Dacca, Burdwan and Presidency Divisions favourable agricultural conditions led to similar competition at the sales of March 1911. It is satisfactory to note that, though the revenue increased largely, the consumption did not show a proportionate advance.

* * * * *

Outstill revenue.

19. The revenue from outstills was Rs. 97,403 against Rs. 95,296, showing an increase of Rs. 2,107. There was an increase of Rs. 9,333 in Chittagong, but Tippera and Noakhali both show a falling off in revenue. The increase in Chittagong was due to better settlement of shops consequent on keen competition among bidders. In Tippera prices reached their maximum in 1909-10 when competition forced bids up beyond the limit of remunerative profit. The falling off since that time is due to a natural reaction. In Noakhali there was little competition and fees fell.

Country spirit licenses.

20. The number of licenses for the sale of country spirit (contract, sadar distillery and outstill) was 1,277, six less than in the previous year. Five new shops were opened after careful enquiry, viz., Burdwan 1, Nadia 2, Faridpur 1 and Rangpur 1, to meet a local demand. Eleven shops were abolished as unnecessary or in deference to local opinion.

Convictions for drunkenness.

21. A statement is annexed (* * * *) showing the number of persons convicted of drunkenness, with the proportion per 10,000 of the population, for all the municipalities in the Presidency. In Calcutta 7,092 persons were convicted for drunkenness against 6,726 in the previous year. Fluctuations in these figures depend chiefly upon the degree of energy displayed by the local police, and they hardly form any convincing index to the drinking habits of the people. One of the retail vendors in Calcutta was found on one occasion selling liquor to persons in an intoxicated condition. He was dealt with under section 65 of the Excise Act.

Distilleries and warehouses

22. There are two modern distilleries in the Province—at Asansol and Konnagore. Government distilleries exist at Russa, Dacca, Faridpur and Barisal. The Russa distillery supplies liquor to Calcutta and its suburbs and to the sadar subdivision of each of the districts of Howrah and the 24-Parganas, where the contract supply system is in force. The Dacca distillery supplies liquor to the districts of Dacca and Mymensingh. The Faridpur and Barisal distilleries supply liquor to their respective districts. The Rajshahi Division receives its supply from the distillery of the Cawnpore Sugar Works, Limited, at Marhourah, in the Saran district of Bihar and Orissa. The other areas under the contract system are supplied from Asansol or Konnagore. The bases used in the manufacture of country spirit vary throughout the Province and are adapted generally to the tastes of the consumers. *Makua* is the base used for the liquor supplied to the Rajshahi Division. In the Russa distillery, Jessore molasses were mostly used, but the supply was limited and the price was liable to much fluctuation. A cheaper molasses from Madras was tried, but the spirit outturn did not find favour with the consumers. An experiment is now being made by using cane *gur* from Bihar mixed with Jessore molasses. In the Dacca distillery the bases employed were cane, date and *chita gur*; in the Faridpur distillery, cane and date *gur*; and in the Barisal distillery, date and *chita gur*. The average outturn in the Dacca, Faridpur and Bakarganj distilleries was good, but the wholesale price charged by the still-holders continued to be high. The quality of the liquor showed some improvement, and the analysis of samples showed that copper contamination was somewhat less.

Several improvements to the Russa Distillery, commenced during the preceding year, were brought to completion during 1911-12. The more important improvements were—

(1) The substitution of 16 large stills with a capacity of 1,000 gallons each in place of 31 small stills of varying capacities.

(2) The setting up of new receiving and storage vats.

(3) The transfer of spirit from the receiving vats through pipes into the storage vats.

(4) The provision of improved spirit inspection safes.

These changes have effected a great improvement in the working of the distillery, but further improvements are necessary before the distillery can be said to be on a really satisfactory footing. The question is occupying the close attention of the Distillery Expert.

* * * * *

TARI.

* * * * *

Statistics.

24. There was little variation in the number of licenses and revenue. The receipts were Rs. 4,26,496 against Rs. 4,22,716 and the number of licenses 1,919 against 1,866. There is little *tari* revenue in Eastern and Northern Bengal, and only Rs. 43,178 were received on this account from the three divisions which lately formed part of the Eastern Bengal province. The Presidency and Burdwan Divisions contributed Rs. 3,83,318.

Fermented *tari*.

25. While the number of fermented *tari* licenses decreased from 836 to 820, the revenue rose from Rs. 4,18,405 to Rs. 4,22,394. The 24-Parganas showed an increase of Rs. 7,508, but there was a large falling off of Rs. 9,422 in the Hooghly district. This decrease in the latter district is attributed to the fact that the fees of the previous year were abnormally high, while a further cause was the increased rent demanded by the owners of trees.

* * * * *

PACHWAI.

Statistics.

28. The total number of licenses issued for retail sale, home-brewing and special manufacture, was 18,162 as compared with 19,032 in previous year. The receipts rose from Rs. 7,44,936 to Rs. 8,17,429. In the Burdwan and Presidency Divisions *pachwai* is supplied from licensed shops, while in the Rajshahi and Dacca Divisions the supply is chiefly met by home manufacture.

Retail sale

29. The number of licenses issued for retail sale was 1,374 as compared with 1,350 in the preceding year. In Bankura 20 additional licenses were issued in the old outstill tracts, where the aboriginal element predominates in the population and where illicit manufacture has been very prevalent and difficult to detect. The privilege of home-brewing at a small fixed fee which had been enjoyed by the aboriginal tribes was withdrawn with effect from the 1st April 1911 in the districts of the 24-Parganas, Nadia, Jessore and Khulna. The withdrawal of the privilege has been met with opposition, principally in the 24-Parganas and Nadia, where the number of such licenses was large and the aboriginal population showed reluctance to take any license for the retail sale of *pachwai*. Eleven new licenses in Nadia and 9 in the 24-Parganas were sanctioned to meet the demand, but it was with difficulty that these licenses could be settled. In Jessore and Khulna, where the number of home-brewing licenses had always been small, no new licenses were given. It is reported from Jessore that the aboriginal classes who were formerly addicted to *pachwai* have now had recourse to country liquor of a weak strength. The aboriginal classes still hope for a reversion to the old system of home manufacture, and it will be some time before the regular shop system of vend of *pachwai* can be successfully worked in these districts.

* * * * * * *

The revenue from licenses for the retail vend of *pachwai* increased from Rs. 6,92,760 to Rs. 7,72,382, or by Rs. 79,622. The increase was most marked in Burdwan (Rs. 51,386). Large increases were also obtained in Darjeeling (Rs. 8,305), Birbhum (Rs. 7,934), Murshidabad (Rs. 5,225) and Midnapore (Rs. 2,693). The increase in Burdwan was due to better settlements and to the fall in the price of rice. In other districts the increase was generally the result of better settlements due to keener competition for the shops. The decrease in the 24-Parganas was due to the change of system which compelled settlements to be made at a low figure.

* * * * * * *

SECTION III.—FOREIGN LIQUOR.

* * * * * * *

Licenses and revenue.

34. The total number of licenses issued for the sale of foreign liquor was 806 against 819 in the previous year. The decrease was chiefly due to the issue of a smaller number of bar licenses for theatres and other places of amusement in Calcutta. Eight licenses for the manufacture of perfumes were issued in Calcutta. No such licenses had previously been granted. The total receipts from license fees amounted to Rs. 3,51,945 as compared with Rs. 3,95,895 in 1910-11. Calcutta accounted for Rs. 13,752 of the decrease, a result of the

lower number of licenses issued in that city. A great part of this decrease is, however, nominal, for the figures of the previous year, which was the first year of the triennial settlement, included the advance deposits in addition to the year's fees of 60 licenses. * * * *

* * * * * *

Imports.

35. The following figures compiled from the report on the Maritime Trade in Bengal for the year, and from a statement furnished by the Collector of Customs, Chittagong, show the imports into the ports of Calcutta and Chittagong during the last two years under the main heads :—

	1910-11. Gallons.	1911-12. Gallons.
Ale, beer and porter	934,542	911,913
Cider and other fermented liquors	3,991	4,855
Spirits and liqueurs.		
Brandy	81,853	63,669
Whisky	203,629	217,402
Other sorts of spirits and liqueurs	297,413	324,408
Total spirits and liqueurs ...	582,895	605,479
Wines	95,014	104,883
GRAND TOTAL ...	1,616,442	1,627,130

There was some increase in the import of light German beer, which appears to be growing in popularity at the expense of British beer. The decline in the import of brandy is due to the fact that large stocks were held at the commencement of the year. There was a general increase in the quantity of wines imported, larger orders having been doubtless placed in anticipation of the Delhi Durbar. The figures "for other sorts of spirits" include spirits used in drugs, perfumed spirits, spirit for methylation and white and rectified spirits. The spirit for methylation came mainly from Java.

Duty-free spirits.

36. The following quantities of rum and rectified spirits were issued duty-free during the year from Calcutta :—

	L.-P. gallons.
Shahjehanpur rum	285
Ditto rectified spirit	493
Asansol " "	5,168
Madras " "	3,380
Total ...	9,326

From the Konnagore distillery tinctures containing 133·9 L.-P. gallons of spirit were issued free of duty to the Government Medical Store, Calcutta, and 16 gallons of rectified spirit containing 90 per cent. of alcohol were supplied to the Agricultural Chemist at Sabour.

* * * * * * *

LOCALLY MANUFACTURED BEER.

Number of breweries.

41. Three breweries—the Gobra in Calcutta, the Victoria Brewery at Sonada, and the brewery at Kurseong—were worked during the year. The condition of the Gobra Brewery improved during the year under the management of Messrs. Parry & Co.

Consumption and revenue.

42. The total quantity of beer issued from the three breweries was 94,036 gallons against 88,653 gallons in the previous year. * * *

The receipts from license fees and duty amounted to Rs. 18,592 against Rs. 17,206 in the previous year.

* * * * * * *

SECTION IV.—HEMP DRUGS.

* * * * * * *

GANJA.

Retail licenses.

49. One thousand four hundred and thirty-four licenses were issued for the retail sale of *ganja* during the year as compared with 1,453 in 1910-11. The license-fees realized amounted to Rs. 14,52,312 against Rs. 13,27,286 in the previous year, the increase being Rs. 1,25,026. The largest increase (Rs. 53,822) was in Calcutta. Rangpur followed with Rs. 13,866, Dinajpur with Rs. 13,283, Jessore Rs. 12,720, and Hooghly Rs. 7,505, the result of keen competition at the sales, in part owing to the introduction of new vendors.

Consumption of *ganja*.

50. The whole of the *ganja* consumed in the Presidency or exported to foreign countries was obtained from Naugaon, in the Rajshahi district. There was a net increase of 53 maunds in the quantity of *ganja* consumed within the Presidency, the figures being 3,117 maunds against 3,064 maunds in 1910-11. The increase of 29 maunds 9 seers in Mymensingh, 9 maunds 23 seers in Faridpur, 19 maunds 35 seers in Dinajpur, 13 maunds 14 seers in Rangpur, and 18 maunds 27 seers in Malda is generally ascribed to agricultural prosperity and to the cheapening of the retail price in some places through rivalry between contending abkars. In Malda the increase is also attributable to the export of a quantity of *ganja* to Nepal. In the 24-Parganas a decrease of 16 maunds 21 seers in consumption is explained by the closure of a few mills in the district. In Dacca the large falling off of 54 maunds 8 seers was due to the high retail prices which the vendors combined to charge, especially in the shops in Dacca town. In Chittagong the vendors combined and came to an understanding amongst themselves not to sell *ganja* below a certain price which was considerably in excess of that previously demanded.

The wholesale prices charged by the goladars fluctuated as usual, the rates varying from Re. 1-8 to Rs. 5 per seer in the Burdwan Division, Rs. 2 to Rs. 6 in the Presidency and Dacca Divisions, Rs. 3 to Rs. 6 in the Chittagong Division, and Re. 1-8 to Rs. 4-8 in the Rajshahi Division.

Total revenue

51. The total receipts amounted to Rs. 29,30,079 against Rs. 27,51,360 in 1910-11, the net increase being Rs. 1,78,719. The increase was most marked in the districts of Calcutta (Rs. 82,183), Dinajpur (Rs. 21,930). Rangpur (Rs. 17,662) and Jessore (Rs. 13,897).

Incidence of taxation.

52. The incidence of license fees per seer was Rs. 11·6 and of duty Rs. 11, or a total taxation of Rs. 22·6. The corresponding figures of 1910-11 were Rs. 10·8, Rs. 11·0 and Rs. 21·8. The amount realized from license fees forms too high a percentage of the total demand, and an increase in the duty coupled with a reduction in the license-fees seemed called for. The question is under examination.

* * * * * * *

Cultivation and outturn of *ganja* at Naugaon in Rajshahi.

54. The low wholesale prices of the previous year continued to operate at the commencement of the year 1911-12, and in consequence the number of applications for permission to cultivate declined; 2,666 applications for an area of 4,257 bighas were received against 3,344 for an area of 5,074 bighas in the preceding year. The principle followed is to allow as many licenses as possible, each to cover a small area, and considering the maximum area that may be cultivated (1,026 acres) it has been decided that the number of licenses should not be less than 2,500. Owing to the comparatively small number of candidates this year, there was little choice in the selection of cultivators. The selection was made for the most part on the basis of good outturn in the

past, and it was found possible to grant licenses to many new cultivators. Two thousand five hundred and seventy-eight licenses, covering an area of 2,946 bighas 15 cottahs and 10 chitaks, were granted as compared with 2,377 licenses covering 2,813 bighas 4 cottahs in 1910-11. The area actually cultivated with *ganja* during the year was 2,957 bighas 13 cottahs 9 chitaks, that of 1910-11 being 2,779 bighas 2 cottahs and 12 chitaks. The outturn amounted to 7,255 maunds 3 seers and 7 chitaks, the average per bigha being 2 maunds 18 seers and 2 chitaks as compared with 2 maunds 21 seers during the preceding season. The cost of manufacture is reported to have been Rs. 30-3 per maund against Rs. 26-9-6 in the preceding year.

* * * * * * *

BHANG.

General.

58. The collection of *bhang* for vend is only allowed in the districts of Monghyr, Bhagalpur and Purnea which now form part, of the new Province of Bihar and Orissa from which places it was imported by vendors in this Presidency. There are large wholesale vendors in Calcutta from whom the retailers of some districts obtain *bhang* instead of importing it from the producing districts. In most of the districts of Eastern Bengal *bhang* grows wild and the demand is small.

As a result of the correspondence mentioned in paragraph 52 of last year's report for Bengal, the wholesale price of *bhang* has been brought under better control in the Presidency and Burdwan Divisions. District officers were requested to grant wholesale licenses only to such persons as were willing to dispose of their *bhang* at a rate not exceeding Rs. 15 per maund. This limit does not appear to have been exceeded by the goladars. No such arrangement was necessary in the Eastern Bengal districts.

Licenses for retail sale, *bhang* permits, and revenue.

59. The number of licenses issued for retail sale was 232 against 271 in the preceding year, the decrease occurring mostly in Calcutta. The number of *bhang* permits fell from 191 to 176. Bankura, Nadia, Jessore and Khulna issued a fewer number of such permits. The revenue from license fees and duty amounted to Rs. 1,01,435 as compared with Rs. 79,712 in 1910-11. License fees rose from Rs. 54,255 to Rs. 70,856 and duty from Rs. 25,457 to Rs. 30,579.

* * * * * *

CHARAS.

Licenses and revenue.

61. Owing to the abolition of one shop in each of the districts of Hooghly and Rangpur, where consumption was very small, the number of licenses decreased from 51 to 49. The revenue from both fees and duty increased and amounted to Rs. 61,163 as against Rs. 51,517 in the preceding year. Almost the whole of the increase was obtained from license fees in Calcutta, where there was keen competition for the licenses in the expectation of improved business during the year.

Imports.

62. The total quantity of *charas* imported was 39 maunds 39 seers against 38 maunds 36 seers in the previous year. The vendors of Calcutta, Birbhum and Malda imported the drug direct from the Punjab; other districts obtained their supplies from the Calcutta vendors.

* * * * * *

SECTION V.—OPIUM.

* * * * * *

General.

66. The restrictive system in regard to the issue of opium to retail shops on their estimated demand obtains in Calcutta and in the districts of Hooghly, Howrah, the 24-Parganas and Chittagong. A special system of licensing opium shops

by lottery among bidders previously approved by the Collector is followed in Chittagong.

Licenses for retail sale.

67. The total number of licenses issued for the retail sale of opium was 1,022 against 1,032 in 1910-11. The question of a reduction in the number of retail opium licenses and druggists' permits in Bengal was taken up during the year, and after due consideration it was decided to abolish 126 shops in the Presidency and Burdwan Divisions with effect from the 1st April 1912. In the Dacca, Chittagong and Rajshahi Divisions the number of opium shops had been reduced to a minimum previous to 1910-11, and no further reductions have since been made.

Druggists' permits.

68. The attention of district officers was invited to the excessively large number of druggists' permits that had been issued, and they were requested to exercise greater scrutiny in the issue of these permits and to confine them to properly qualified persons. As a result the number was reduced from 1,062 in 1910-11 to 564 in 1911-12 in the Presidency and Burdwan Divisions and in Darjeeling, and a further reduction has been ordered with effect from the 1st April 1912. In the Dacca, Chittagong and Rajshahi Divisions, excluding Darjeeling, the number was 207 in 1911-12 against 195 in 1910-11. The number of licenses for the sale of poppy heads was 14 against the same number in the previous year.

As noticed in paragraph 65 of the Bengal Report for 1910-11, restrictions on the import of opium and its preparations came into force from the 1st June 1911. As a very large number of opium preparations are used for medicinal purposes, considerable difficulty was experienced at the outset in giving effect to these orders, and it was not until the 1st January 1912 that adequate control over the import of these preparations was obtained. Permits were issued by this office only to respectable chemists, druggists and other importers of medicines after due enquiry in each case had been made by the Collector of Calcutta. Permits to import these preparations were given rather freely to chemists and druggists, as no list of preparations containing opium in a negligible quantity or in such condition that they could not be used for intoxicating purposes has been prescribed, and the ordinary business of many firms would have been seriously interfered with. A list of preparations to be exempted from the restrictions regarding importations has recently been prescribed by the Government of India, and the restrictions regarding permission to import will now be rigorously applied, permission being given only to large firms of chemists and druggists and importers of medicines from whom the small dealers can purchase their requirements.

License fees.

69. The revenue from license fees rose from Rs. 6,58,528 to Rs. 8,11,570. The increase was largest in Calcutta, Rs. 1,15,703, Chittagong showing the next largest increase, Rs. 10,919. In both places the restrictive system of supply of opium to retail shops was in force. This induced vendors to secure shops at very high prices in the hope of raising the retail price and reaping a good profit. In the 24-Parganas the auctions resulted in an increase of about Rs. 12,000 in license fees.

Consumption and duty.

70. The total quantity of opium consumed within the Province was 1,669 maunds 23 seers as compared with 1,626 maunds 4 seers in the previous year, an increase of 43 maunds 19 seers. The largest increase obtained in Calcutta (8 maunds 4 seers), where it was due partly to small increases allowed to some retail shops, but chiefly to supplies to the Military authorities. An increase of 5 maunds 30 seers in Midnapore and of 7 maunds 16 seers in Hooghly is explained by the fact that there was less importation from Calcutta by local consumers owing to the rise in the retail price at the latter place. An increase of 3 maunds 10 seers in Darjeeling is attributed to the influx of a large number of Tibetans to meet the Dalai Lama. The Collector of Malda explains the increase of 4 maunds 25 seers to improved prosperity from agriculture. There was an increase of 2 maunds 30 seers in Bakarganj. Sales in certain localities of this district have largely increased, and it is

probable that a certain amount of smuggling was prevalent. The situation is being carefully watched. Six districts showed a decrease in consumption, the largest falling off being 1 maund 7 seers in Tippera, where it was due to strict supervision over some retailers who are suspected of selling to smugglers. In one case a vendor was changed, and there was a considerable drop in the sales of the shop. The receipts from duty rose from Rs. 14,12,195 to Rs. 14,49,723, or an increase of Rs. 37,528. The issues of opium to foreign territories rose from 9 maunds 1 seer to 10 maunds 2 seers, due to a larger quantity being taken by the farmer of French Chandernagore.

Total receipts.

71. The total receipts amounted Rs. 22,61,293 against Rs. 20,70,723 in 1910-11, an increase of Rs. 1,90,570, or 9 per cent., while consumption rose by 2·7 per cent. only, a satisfactory result.

Madak and *chandu*.

72. The habit of opium smoking was prevalent in a few districts only, notably Calcutta, Murshidabad, Burdwan, Midnapore, Dacca and Chittagong. Smoking saloons continued to exist and, though some Collectors report that the habit is not spreading, it does not appear to be showing signs of diminution. It seems unlikely that the evil will disappear until these smoking saloons are prohibited by law.

Morphia and opium pills.

73. The use of morphia as a substitute for opium has been reported to exist to a limited extent in Hooghly, Calcutta, Nadia and Jessore.

The use of opium pills has not been reported from any district.

SECTION VI.—COCAINE, NOVOCAINE, ETC.

* * * * * * *

General.

75. During the year coca leaves, all alkaloids of coca and all drugs, preparations or admixtures thereof having a like physiological effect to that of cocaine, came within the purview of the Bengal Excise law, and the rules relating to the sale and limit of possession of these drugs underwent revision. The principal feature of the new rules is that possession by private persons, except under the *bonâ fide* prescription of a duly qualified medical practitioner, of any of these drugs is absolutely forbidden. Maximum limits of possession under such prescriptions have also been prescribed. The limits of possession by medical practitioners, chemists and druggists were revised, and ordinarily the maximum quantity which may now be sold by one chemist to another will be 1 ounce or by a chemist to a dentist ½ ounce. Similar limitations and rules were also framed for the Dacca, Chittagong and Rajshahi Divisions, and these came into force in these divisions with effect from the 1st April 1912.

Licenses and revenue

76. Two hundred and seventy-five licenses, of which two were issued free to managers of hospitals or dispensaries not under Governmennt supervision, were issued for the sale or possession of cocaine, as compared with 281 in 1910-11. The receipts from license fees amounted to Rs. 278. In Calcutta 13 separate license were issued for novocaine, eucaine, beta eucaine and holocaine. Such separate licenses were not granted elsewhere.

Illicit importation of cocaine through French territory in British India

77. In paragraph 72 of the Bengal Report for 1910-11 reference was made to the smuggling of cocaine and similar drugs through French Chandernagore. In addition to the measures noted in that report a decree of the French Government has since been promulgated in the French Settlements in India prescribing that no one in any French territory in India shall practise as a chemist unless he is the holder of a French University or Colonial diploma, and such diploma only will entitle the holder to sell cocaine and similar drugs. Sale by any other person has been made punishable with fine ranging from 100 to 3,000 francs and to imprisonment from 6 days to 2 months.

78. The number of persons convicted of illicit sale and possession of cocaine was 631 (559 in Calcutta, 37 in Hooghly, 20 in the 24-Parganas, 12 in Burdwan, 2 in Midnapore and 1 in Dacca) against 317 in the previous year. In Calcutta the quantity of the drug seized in cases of illicit possession was 310¾ ounces. The Customs officers made important seizures, in which 264 ounces of the drug were confiscated. An enormous demand for the drug as an intoxicant exists and its illicit price is so high that smuggling operations continue to be remarkably profitable. The Customs and Excise officers in Calcutta have been very vigilant, and the year's operations against the illicit dealers have been eminently satisfactory. The increase in the traffic in Calcutta, and the activity of the Preventive officers, is evidenced by the following figures which give the number of convictions during the past four years :—

Prosecutions.

1908-09	... 123	1910-11	... 270
1909-10	... 258	1911-12	... 559

The Collector of Calcutta writes as follows :—

"With the exception of the very few cases in which the accused were detected while smuggling the drug into the town from the vessels in port, nearly all the cases were against the retail sellers with whom only small quantities were found. Two of the accused in the Customs officers' cases were Austrians who were members of the crew of a vessel lying off the jetty. The remaining accused were Indians and Chinamen, all members of ships' crews. It would have been more satisfactory if the Excise and the Police officers had been able to attack the dens of the illicit wholesale traders who form the link between the smugglers and the retail sellers by procuring the drug from the ships and supplying them to the retailers."

* * * * * * *

"It is to be regretted that Europeans have come forward to participate in the illicit traffic and are lending their ingenuity in furtherance of the trade. The crews of ships, both European and Indian, still form the chief smugglers, but instances are not wanting in which the drug is smuggled as postal packets containing books. In one case recently detected at the Custom House the drug was imported in tins containing sugar of milk. The cocaine was contained in a paper packet ingeniously concealed at the bottom of each tin which was then filled up with sugar of milk. The most recent seizure is a very large one of 480 ounces, in which the cocaine was contained in 1-lb. tins securely fastened and labelled "Fine Cornflour."

The Collector of Burdwan reports that the cocaine habit is spreading to a considerable extent in the towns of Burdwan, Raniganj and Asansol. Reports have also come from Hooghly and Midnapore of cocaine being used as an intoxicant in the towns of Serampore and Khargpur. In Eastern Bengal, Dacca is the only town where cases of illicit dealings in cocaine have been detected, and it is believed that other places are as yet immune.

Cultivation of coca

79. There is no coca cultivation at present, so far as is known, in any part of this Presidency.

SECTION VII.—OFFENCES AGAINST THE EXCISE AND OPIUM LAWS.

* * * * * *

80. The total number of persons arrested during the year was 2,904 against 2,899 in the previous year. There was a marked increase in the number of arrests made in Howrah (32), Calcutta (478) and Murshidabad (27). The increase in Howrah is due to more numerous cases of illicit possession of *tari*; in Murshidabad to illicit possession of *tari* and illicit manufacture of *pachwai*. Cocaine cases account for the great increase in Calcutta.

Arrests and convictions.

THE following Notices are published for general information.

H. H. GREEN,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 8th October 1912.*

HONGKONG.

Signals to be made by vessels approaching Defended ports when inconvenienced by searchlights.

No. 472 (first publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1125 of 1912), are republished :—

Any vessel approaching a defended port in the Colony of Hongkong when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined :—

(*a*) By flashing lamp, *four short* flashes followed by *one long* flash.
(*b*) By whistle, siren, or fog-horn, *four short* blasts followed by *one long* blast.

Whenever possible, both flashing lamp signals and sound signals should be used.

On these signals being made, the searchlights will be worked so as to cause the least inconvenience, being either doused, raised, or their direction altered.

The signal should not be used without real necessity, as unless the vessel is actually in the rays of the searchlight it is impossible to know which searchlight is affected.

Note.

The signals are designed to assist mariners and do not render the Government liable in any way.

No. 465 (second publication).—The following particulars, etc., relative to the above, issued by the Director of the Royal Indian Marine, Bombay, in Notice to Mariners (No. 197M of 1912), are republished :—

Subject.—As the sand bank at the bar is tending to increase towards the south thus approaching the sailing line through the Malim Campal marks, Mariners are advised that though there is the same depth of water as before (minimum 11′ in low tide) on this line, it is prudent to enter with the marks a little open, thus keeping the light at Malim to the south of that at the Campal. In order to obtain greater depth (minimum 12′ in low tide) the Malim light should bear between the two pillars painted white which are on the margin of the circular terrace where Bamastarim gun is and which is about 30 meters to the south of the Campal Light. If the Malim Campal sailing mark is to be followed, it is necessary to prevent a vessel yawing to port or the north side.

At night it will suffice to keep the red lights a little open, keeping the higher one Malim a little to the north of the other.

AUSTRALIAN PORTS.

Caution when approaching Australian ports.

No. 470 (second publication).—The Portmaster, Brisbane, has given Notice (No. 10 of 1912) as follows :—

In connection with periodical exercises or manœuvres, or in the event of relations becoming strained between Great Britain and any Naval Power, an Examination Service may come into force at the ports or localities mentioned at the end of this notice.

Masters are warned that before attempting to enter any of these ports they must, in their own interests, strictly obey all instructions given to them by the vessels which will be charged with the duty of examining ships desiring to enter the ports, and allotting positions in which the ships shall anchor. In case of fog, they should on no account attempt to enter before receiving permission from the Examination Officer.

The institution of an Examination Service at any port will never be publicly advertised, but at all times when the relations of Great Britain with foreign powers are known to be in a state of tension, especial care should be taken in approaching the ports, by day or by night, to keep a sharp look-out for the Examination Steamer, and to be ready to "Bring to" at once when hailed by her or warned by the firing of a gun.

If the entrance to a port is closed, three red vertical lights by night, or three red balls by day, will be exhibited in some conspicuous position, in or near to its approach, and as far as possible notice of this fact will be given by look-out vessels in the offing.

If the Examination Service is in force the Examination Steamer will be distinguished at night—

(*a*) When the port is closed, by three red vertical lights.

(*b*) When the port is open, by three white vertical lights.

The pilots attached to the ports will be acquainted with the regulations to be followed.

The Astronomical positions are only approximate unless seconds are given. The bearings are given both True and Magnetic.

RESOLUTION ON THE ANNUAL REPORTS OF THE VETERINARY COLLEGE AND OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1911-12.

REVENUE DEPARTMENT.

AGRICULTURE.

DARJEELING, THE 10TH OCTOBER 1912.

RESOLUTION—No. 2126T.R.

READ—

The Annual Reports of the Veterinary College and of the Civil Veterinary Department, Bengal, for the year 1911-12, with the Director of Agriculture's Review thereof.

IN consequence of the territorial rearrangements which took place on the 1st April 1912, the annual report for the year 1911-12 deals with the new Province of Bengal comprising the districts of the Burdwan, Presidency, Dacca, Chittagong and Rajshahi Divisions, and also the district of Darjeeling which now falls within the last-mentioned division.

Colonel Raymond, C.I.E., was Principal of the Bengal Veterinary College, and Mr. Quinlan and Mr. Harris were Superintendents of the Civil Veterinary Departments in Bengal and Eastern Bengal and Assam, respectively, throughout the year. Since the reconstitution of the new Presidency, Major Smith,

the present Principal of the Bengal Veterinary College, has been appointed temporarily to hold the post of Superintendent in addition to his other duties, pending the appointment of a separate Superintendent for this Province. Mr. Quinlan spent 32 days on tour in the districts of the Burdwan and Presidency Divisions and in Darjeeling. Mr. Harris was on tour for 61 days in Eastern Bengal, visiting Narayanganj 17 times in connection with the outbreak of glanders.

2. The number of students on the college roll at the end of the session was 110, the number at the end of the sessions of the three preceding years being 138 in 1910-11, 132 in 1909-10 and 132 in 1908-09. The decrease seems to be due to a falling off in the number of non-stipendiary students, of whom there were only 9 as compared with 31, 25 and 26 in the three antecedent years. An inquiry will be made as to the causes of this diminution in numbers. The results of the final examination were satisfactory, the percentage of passes being 79·38 as against 76 in the year 1910-11.

3. The Raymond Research Laboratory continued to do excellent work, especially with reference to the diagnosis of infectious diseases and the examination of pathological and other specimens. Three hundred and twenty-six autopsies were made, and eight samples of bone-meal were bacteriologically examined on behalf of the New Zealand Government. A quantity of normal sterile horse serum was prepared and supplied to various leading medical men of Calcutta. Two veterinary graduates from Bengal and two from Eastern Bengal and Assam attended the post-graduate course of training. The Governor in Council notices with great satisfaction that this institution has not only done important research work within the Province, but has also assisted in the supply of valuable specimens to scientists abroad.

4. The report of the Civil Veterinary Department shows that there was a considerable decrease in mortality from the principal contagious diseases. The number of deaths amongst bovines declined from 12,000 in the previous year to 8,522. It is gratifying to note that anthrax, black quarter, haemorrhagic septicæmia and rinderpest were less fatal than in the previous year. It is impossible to overestimate the value of preventive inoculation in dealing with all these diseases, and the figures show that out of 18,241 bovines inoculated against rinderpest only 73, or ·4 per cent., died. One thousand seven hundred and fourteen deaths are reported under the head of haemorrhagic septicæmia, but no deaths occurred among the 2,838 animals inoculated against this disease which causes heavy loss to cultivators throughout the Province. His Excellency in Council considers that the education of the raiyat to a proper understanding of the value of inoculation is a matter of prime importance, and he would impress on the officers of the Department the desirability of utilizing every opportunity for explanation and demonstration of the benefits of this operation when touring in the mufassal.

5. The itinerant veterinary assistants visited 8,055 villages as against 7,103 in the previous year. Outbreaks of diseases are being reported more frequently than in the past, and it is gratifying to observe that much greater interest is now being taken in this matter both by members of the Agricultural Associations and by private persons. The arrangements for notifying casualties still, however, leave much to be desired. The village *panchayats* have not yet realized the importance of their duties in this respect and steps should be taken to impress upon the Presidents and Collecting Members of these bodies the necessity for prompt action. The speedy arrival of a veterinary officer at the scene of an outbreak of disease may be the means of saving the villagers from heavy pecuniary loss, as the statistics show that inoculated animals survive the epidemic in all but an infinitesimal number of cases. His Excellency in Council desires, therefore, to repeat the injunction given to the veterinary assistants in the Resolution of the late Government of Eastern Bengal and Assam for the year 1910-11 to the effect that they should lose no opportunity of impressing on the people the necessity for reporting even sporadic cases of disease at the time of occurrence.

6. In Calcutta and its neighbourhood 3,800 stables were inspected, of which only 15 were found to be infected with glanders, as compared with 34 in the previous year. The Governor in Council notices with regret the complaint made by the Superintendent, Civil Veterinary Department, that certain municipalities adopted an obstructive attitude towards the officers entrusted with the administration of the Glanders and Farcy Act. An

enquiry will be made into the matter. Although contagious equine diseases are not of such serious importance as bovine diseases in this Presidency, the figures show that the Department does not neglect this branch of veterinary work. The system of granting compensation to the owners of animals destroyed has greatly facilitated the stamping out of disease.

7. It is reported that in certain districts the existing staff of veterinary assistants has been found to be insufficient to cope satisfactorily with outbreaks which occur in remote parts of the mufassal. The proposal to increase the number of veterinary assistants in the near future will be carefully examined.

8. The important question of improving the breed of cattle has been engaging the attention of Government for some time. The demand for bulls for breeding purposes is on the increase, but the indigenous stock is poor and fodder is often deficient. The complaint that no attempt is made to select the best cows for breeding and that immature bulls are allowed to cover the herd is general and well-founded, but no efficient remedies for such difficulties have been found during the past 15 years. If suitable bulls can be obtained in local cattle fairs, as is suggested by the Director of Agriculture, every endeavour should be made to prevent their being castrated and to promote their distribution for breeding purposes throughout the country. The Governor in Council is confident that the Director of Agriculture will give to this important matter the careful consideration which it demands, and he will be prepared to support any suitable scheme for encouraging the improvement of the livestock of the country by means of the selection of the best animals for breeding purposes that the Director after full enquiry may be prepared to recommend.

9. Measures were adopted during the year to carry out a survey and census of cattle in the Province. The Director of Agriculture's report on the subject has not yet been submitted to Government.

10. There has been a striking falling off in the number of animals sent for treatment under the Prevention of Cruelty to Animals Act both in Calcutta and in the mufassal. Only 148 animals were sent for treatment to the Veterinary College Hospital, although the number of prosecutions was 11,330. It seems probable that the owners of disabled animals pay the fines and immediately put the animals in use again without first placing them under proper treatment. The attention of the trying Magistrates will be drawn to the desirability of sending all disabled and diseased animals to hospital. The Corporation of Calcutta have now appointed their own veterinary officer and have not sent many cases to the Veterinary College. It is, however, gratifying to notice that the decrease in the Corporation cases has not prevented a steady increase in the number of cases treated by the college staff.

11. It is reported that many veterinary dispensaries, such as those at Bakarganj, Noakhali, Bogra and Pabna, have no accommodation for in-patients, while at Dacca only municipal bullocks are provided for. Great importance is attached to this branch of veterinary work, and if the Department is to become as successful as the value of its work demands, steps should be taken to remedy this defect. There was a decrease of 3,004 in the number of cases treated at the veterinary dispensaries. There was a falling off in the number of patients at the Dacca Dispensary owing to fewer seizures under the Cruelty Act, but the general health of the year has been good, and the decrease in epizootic diseases is sufficient to explain the general diminution in the number of patients.

12. Colonel Raymond, C.I.E., retired from the service of Government after the close of the year, and the Governor in Council in a valedictory notice placed on record his high appreciation of the value of the services rendered by him to the cause of veterinary science and to the cultivators of Bengal during a period of more than 15 years. The reports reviewed above form a fresh testimony to the ability and experience with which Colonel Raymond carried out the duties entrusted to him.

By order of the Governor in Council,

J. H. KERR,

Secretary to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary forecast of the late variety of the Sesamum (Til) in 1912 in the Presidency and Burdwan Divisions.

[On an average of the five years ending 1910-11 the area under *til* in Bengal represents some 5·9 per cent. of the total area under *til* in British India.]

Explanatory.—The present forecast only deals with the districts of the Burdwan and Presidency Divisions.

The crop is most important in Midnapore, where it covers more than one-third of the entire area under late *til* in these divisions.

Area sown.—The total area sown up to date is reported to be 21,200 acres. Sowings are still reported to be going on in parts of Hooghly, Murshidabad and Nadia. Last year the area under the crop was estimated at 22,500 acres. The present condition of the crop is generally reported to be fair.

INDIAN FOREST SERVICE.

REGULATIONS AS TO THE APPOINTMENT OF PROBATIONERS, 1913.

1. *Appointments.*—The Secretary of State for India in Council will, in the summer of 1913, make *not less than five appointments* of Probationers for the Indian Forest Service, provided that so many candidates are considered to be in all respects qualified.

In making these appointments, he will act with the advice of a Selection Committee.

2. *Applications for Appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Revenue Department, India Office, Whitehall, London, S.W., and to be returned to him not later than *Tuesday, the 1st July 1913.* Candidates must be prepared, if called upon, to attend at the India Office, at their own expense, for a personal interview with the Selection Committee within three weeks from that date.

3. *Age Limit.*—Candidates must be not less than 19 but under 23 years of age on the 1st July 1913.

NOTE.—The Secretary of State, in modification of the notice given in the 1912 Regulations, has decided to retain for 1913 the age limits which have hitherto been in force For the recruitment of 1914 and following years the age limits will, in accordance with the aforesaid notice, be 19 and 22 years on the 1st *January* of the year in which the selection is made.

4. *Nationality &c.*—Every candidate must be a natural-born subject of His Majesty. He must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he does so, he will forfeit his appointment. He must be of good physique, and must produce evidence of character, to satisfy the Secretary of State for India in Council that he is suited for the Indian Forest Service.

5. *Qualifications.*—Candidates must have obtained a degree *with Honours* in some branch of National Science* in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland. A degree in Applied Science will not be considered as fulfilling these conditions. Candidates will be required to produce evidence that they have a fair knowledge of either German or French.

NOTE —Applications for appointment will be accepted from candidates who on the 1st July 1913 have already sat at an examination for a degree as mentioned above, but have not learned the result of the examination.

6. Should there be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Particulars of this examination, which would be held in August, will be found in Appendix I.

7. *Medical Examination.*—Selected candidates will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing, and to satisfy the Secretary of State for India that they are physically fit for service in the Indian Forest Department (*see* Appendix V).

Candidates who do not satisfy the Secretary of State for India that they are physically fit for appointment to the Indian Forest Service will not be admitted to the competitive examination mentioned in Regulation 6.

8. *Period of Probation.*—The ordinary period of probation will be two years. During that time probationers will be required to pass through the Forestry course at one of the Universities named in the margin,* becoming members of that University if not so already; to obtain the Degree or Diploma in Forestry which it grants; and to satisfy such other tests of

* Oxford, Cambridge, or (subject to the arrangement of a suitable course) Edinburgh.

* A Moderatorship in Natural Science or in Experimental Science at the University of Dublin will be considered as fulfilling these conditions

proficiency as may be deemed necessary. The case of students who have already obtained such degree or diploma at any of the above-named Universities will be specially considered in each case.

During the vacations the probationers will, under the direction and supervision of the Director of Indian Forest Studies appointed by the Secretary of State for India in Council, receive practical instruction in such British and Continental forests as may be selected for the purpose.

9. *Charges.*—The probationers will be required to defray all expenses of lodging, board, tuition, and excursions, while at the University, and on practical instruction in Britain and on the Continent, with the exception of fees payable to local forest officers in Britain and on the Continent.

10. *Allowances.*—The Secretary of State for India in Council will make payments to each probationer at the rate of 120*l* annually, not exceeding a total of 240*l*. (besides the fees to local officers mentioned above). These payments will ordinarily be made on the following dates in each year:—

	£
On the 1st December	30
On the 1st March	30
On the 1st June	60

The cases of probationers whose probation does not extend over the full two years will be specially considered.

The grant of the allowances is subject to the following conditions:—

(*a*) that the progress of the probationer in his studies is satisfactory;
(*b*) that the probationer gives security to refund the payments in case he fails to join the Indian Forest Service at the end of the period of probation.

11. *Conduct.*—Every probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such a manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of probationers.

12. *Appointment and Seniority.*—Probationers who obtain a Degree or Diploma in Forestry, and also satisfy such other tests of proficiency as may be prescribed, will be appointed Assistant Conservators in the Indian Forest Department, provided they are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest Service. Their position in the provincial Forest Lists will be determined by the Secretary of State for India in Council on the report of the Director of Indian Forest Studies; but in making selections for the post of Conservator, officers joining the service in the same year are reckoned as equal in seniority unless the Secretary of State for India in Council shall for special reasons have directed otherwise in any particular case or cases.

Probationers will be allowed at the end of the period of probation to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India in Council. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

13. *Riding.*—Every probationer, before proceeding to India, will be required to satisfy the Secretary of State, in such manner as may be determined, of his ability to ride.

14. *Articles of Agreement.*—Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and must engage his own passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

15. *Passage Allowance.*—An allowance on account of passage to India will be paid to each probationer on appointment to the Indian Forest Service, to the amount of 37*l*. 10*s*. for passage to Calcutta, Madras, or Bombay, and 43*l*. for passage to Rangoon.

NOTE.—The above is the normal rate of passage allowance. In consequence of the surtax of 10 per cent. at present charged by shipping companies in respect of passages to India the above rates of passage allowance have been raised to 41*l.* 5*s.* and 46*l.* 5*s.* respectively.

Should this surtax be removed, these rates will be reduced to those given in paragraph 15.

16. *Salary.*—An Assistant Conservator of Forests will draw pay at the rate of Rs. 380 a month (equivalent to 304*l.* a year, when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

17. *Promotion, Leave, Pension, and Provident Fund.*—Promotion, leave, and pension will be governed by the Regulations laid down by the Government of India, and applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulations can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix II; a summary of information regarding leave is contained in Appendix III; and regarding Pensions and the Provident Fund in Appendix IV.

INDIA OFFICE. *September 1912.*

(See paragraph 17 of the Regulations.)

LEAVE.

1. The following is a summary of the principal regulations relating to the leave admissible to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom.

Long Leave.

2. Furlough and special leave with allowances (*see* paragraph 6) are admissible to an aggregate maximum amount of six years during an officer's service. The amount of furlough "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

3. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after intervals of not less than three years' continuous service. It is limited to two years at a time.

4. Furlough on medical certificate may be granted (*a*) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (*b*) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

5. The allowances admissible during furlough are :—

(1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may be "due"—half average salary, subject to certain maximum and minimum limits.

(2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to certain maximum and minimum limits.

6. Special leave may be granted at any time for not more than six months, with intervals of six years' service ; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments.

Short Leave.

7. Privilege Leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption ; and it may be accumulated up to three months, earned by 33 months' duty. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

8. Subsidiary leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end and not at the beginning of combined leave.

9. Short leave is also granted to enable officers to appear at examinations, &c.

10. Extraordinary leave without allowances may be granted in case of necessity, and except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

General Rules.

11. Leave of absence can never be claimed as of right, and is given or refused at the discretion of Government.

12. After five years' continuous absence from duty, an officer is considered to be out of the employment of Government.

13. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1*s.* 6*d.* to the rupee. Privilege leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1*s.* 4*d.* to the rupee.

APPENDIX IV.

(*See paragraph 17 of the Regulations.*)

PENSIONS AND PROVIDENT FUND.

1. The following is a summary of the principal pension rules applicable to officers of the Indian Forest Service appointed by the Secretary of State from the United Kingdom.

An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire

from the service through ill-health, not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows:—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts:—

Years of completed service.	Maximum limit of pension.
	Rs.
10	1,000 a year.
11	1,400 "
12	1,800 "
13	2,200 "
14	2,600 "
15, 16, 17, 18, 19	3,000 "

After a service of not less than 20 years, a retiring pension not exceeding the following amounts:—

Years of completed service.	Scale of pension.	
	Sixtieths of average emoluments.	Maximum limit of pension.
		Rs.
20 to 24	30	4,000 a year.
25 and above		5,000 "

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year, subject to the condition that the officer must not retire voluntarily before the completion of a total qualifying service of 28 years.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1*s.* 9*d.* the rupee.

2. A General Provident Fund has also been established on the following basis:—

(*a*) The contribution is compulsory up to 6¼ per cent. on salaries, with voluntary contributions of not more than a further 6¼ per cent. Subscriptions on leave of any kind are optional.

(*b*) Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.

(*c*) The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service; or, in the event of his death before retirement, to his legal representatives.

(*d*) Other forms of life insurance will, however, if they fulfil certain conditions, be accepted in lieu of the contributions in (*a*).

APPENDIX V.

GENERAL PHYSICAL REQUIREMENTS.

NOTE.—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject as unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service, and that his discretion is in *no* respect limited by these Regulations.

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height and chest girth :—

Age.	Height without shoes.	Chest.	
		Girth when expanded	Range of expansion.
	Inches.	Inches.	Inches.
19 to 20	62½ and under 65 ...	35	2
	65 " 68 ...	35	2
	68 " 70 ...	35½	2
	70 " 72 ...	36	2
	72 and upwards ...	36½	2½
21 and upwards ...	62½ and under 65 ...	35	2
	65 " 68 ...	35½	2
	68 " 70 ...	36	2
	70 " 72 ...	36½	2½
	72 and upwards ...	37	2½

3. *Measurement of Height.*—The candidate will be placed against the standard with his feet together, and the weight thrown on the heels, and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks, and shoulders touching the standard; the chain will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be noted in parts of an inch to eighths. No fixed limit of height is imposed.

4. *Measurement of Chest.*—The candidate will be made to stand erect with his feet together, and to raise his hands above his head. The tape will be carefully adjusted round the chest, the posterior upper edge touching the inferior angles of the shoulder blades, and its anterior lower edge the upper part of the nipples. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to empty his chest of air as much as possible. This is best done by continuous whistling with the lips as long as sound can be produced. The tape is carefully gathered in during the process, and when the minimum measurement is reached it is recorded. The candidate will then be directed to inflate his chest to its utmost capacity. This maximum measurement will likewise be noted. The girth with the chest fully expanded and the range of expansion between the minimum and the maximum will then be recorded.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, *i.e.*, decayed or broken teeth must be properly stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocle, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease,

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

14. Candidates may, not more than two years before they are qualified to compete for an appointment, undergo a preliminary examination by the Medical Board, which meets at the India Office every Tuesday, under the following conditions :—

(*a*) Applications must be addressed to the Under-Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas, and a statement of the candidate's age.

(*b*) Candidates must pay their travelling expenses.

(c) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board, prior to their appointment.

(d) On the other hand, it must be distinctly understood that the preliminary examination by the Medical Board is held solely for the candidate's information, and that, if after that examination he is reported to be apparently fit, he has not on that account any claim to be accepted as physically fit when he presents himself for the final Medical Examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the service, at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination or for other reasons.

REGULATIONS AS TO THE STANDARD OF VISION FOR THE INDIAN FOREST SERVICE.

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 2·5 D, and if with correcting glasses, not exceeding 2·5 D, the acuteness of vision in one eye equals $\frac{6}{6}$ and in the other $\frac{6}{9}$, there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate for service, provided the lens or the combined spherical and cylindrical lenses required to correct the error of refraction do not exceed—2·5 D; the acuteness of vision in one eye, when corrected, being equal to $\frac{6}{6}$, and in the other eye $\frac{6}{9}$, together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals $\frac{6}{6}$, and in the other eye equals $\frac{6}{9}$ with + 4 D or any lower power.

4. Hypermetropic astigmatism does not disqualify a candidate for the service, provided the lens or combined lenses required to cover the error of refraction do not exceed 4 D, and that the sight of one eye equals $\frac{6}{6}$ and of the other $\frac{6}{9}$, with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than $\frac{6}{18}$. In such a case the better eye must be emmetropic Defects of vision arising from pathalogical or other changes in the deeper structures of either eye, which are not referred to in the above rules, may exclude a candidate for admission into the service.

6. Squint, or any morbid condition, subject to the risk of aggravation or recurrence, in either eye, may cause the rejection of a candidate. The existence of imperfection of colour sense will be noted on the candidate's papers.

Signals to be made by vessels approaching defended ports when inconvenienced by searchlights.

No. 496 (first publication).—Any vessel approaching a defended port in British India when searchlights are being worked, and finding that they interfere with her safe navigation, may make use of the following signals, either singly or combined :—

(*a*) By flashing lamp, four short flashes followed by one long flash.

(*b*) By whistle, Siren, or fog-horn, four short blasts followed by one long blast.

Whenever possible, both flashing lamp signals and sound signals should be used.

On these signals being made, the searchlights will be worked so as to cause the least inconvenience, being either doused, raised, or their direction altered.

The signals should not be used without real necessity, as unless the vessel is actually in the rays of a searchlight it is impossible to know which searchlight is affected.

No. 465 (third publication).—The following particulars, etc., relative to the above, issued by the Director of the Royal Indian Marine, Bombay, in Notice to Mariners (No. 197M of 1912), are republished :—

Subject.—As the sand bank at the bar is tending to increase towards the south thus approaching the sailing line through the Malim Campal marks, Mariners are advised that though there is the same depth of water as before (minimum 11′ in low tide) on this line, it is prudent to enter with the marks a little open, thus keeping the light at Malim to the south of that at the Campal. In order to obtain greater depth (minimum 12′ in low tide) the Malim light should bear between the two pillars painted white which are on the margin of the circular terrace where Banastarim gun is and which is about 30 meters to the south of the Campal Light. If the Malim Campal sailing mark is to be followed, it is necessary to prevent a vessel yawing to port or the north side.

At night it will suffice to keep the red lights a little open, keeping the higher one Malim a little to the north of the other.
